Brief Description of Undergraduate Courses Taught: (Course Title – Code: Description)

Medical Instrumentation – MLT 213: The aim of this course is to provide knowledge about the basic types of clinical laboratory instruments and the principles of their operation and use.

Hematology I - MLT 223R: The course aims to study the normal maturation sequence of both white blood cells (WBC) and red blood cells (RBCs) and their benign and abnormal disorders. In addition to the study of Pathology and Physiology of the formed elements of blood with an emphasis on clinical correlation.

Hematology II - MLT 313: The course aims to provide students with the necessary knowledge to understand principles and physiologic significance of coagulation and to provide students with the ability to perform many basic tests integral to a coagulation laboratory.

Clinical Hematology Rotation - MLT 411: This course continues and consolidates the theoretical and practical application of routine and special hematological procedures, both manual and automated with stress on new automated techniques.

Blood Banking and Transfusion Medicine - MLT 321: This course will introduce the students to the theoretical aspects of immunohematology and introduce comprehensive and evolving discipline of transfusion medicine.

Clinical Blood Banking Rotation – MLT 412: This course aims to initiate students for the clinical applications and result interpretations of the serologic tests and methods used in the blood bank laboratories. This course permits for MLT students the management of blood and blood components that are used in the operative, emergency, and surgical rooms. This course will help students to manage the blood units and to take the appropriate decision to choose the compatible blood unit for transfusion.

Clinical Immunology and Serology – MLT 423: By the end of the course students should be able to improve their skills and broad their information based on fundamental knowledge gained from courses during level 3 and process clinical samples from patients suffering from immunological diseases.

Administrative Responsibilities:

#	From	To	Position	Organization
1	April, 2022	Up to date	Internship Coordinator of CLS department	CAMS – College of Applied Medical Sciences
2	Feb, 2012	June, 2015	Academic Affairs Coordinator of CLS department	CAMS – College of Applied Medical Sciences

Personal Key Competencies and Skills: (Computer, Information technology, technical, etc.)

1	Computer skills: Microsoft Office
2	Soft skills: Active listening, Collaboration, Focus, Leadership, Problem Solving, Responsibility, Teamwork and Time management
