6. Medical Laboratories of KFHU activates "World Laboratory Day"

Under the sponsorship of H.E. President of Imam Abdulrahman bin Faisal University (IAU), Prof. Abdullah Al-Rubaish, King Fahd University Hospital in Al-Khobar (KFHU), represented by its Directorate of Medical Laboratories, activated the (World Laboratory Day) in the main lobby of the hospital, in the presence of the Dean of Medicine, Dr. Bassam Awari, Director General of KFHU, Dr. Muhammad Al-Shahrani, and the consultant pathologist who is the Director of the Department of Medical Laboratories and Blood Bank Dr. Amal Al-Adini.

KFHU D.G, Dr. Muhammad Al-Shahrani, said "this event is a part of events and activities series implemented by the hospital aiming to raise the level of awareness among attendees and targeted groups".

Dr. Amal Al-Adini, stated "this day included an exhibition of 8 pillars; safety as priority and quality as a standard, blood draw, biochemistry, immunology lab, hematology lab, microbiology lab, histology lab, blood bank lab, and diagnostic cell and molecular genetics lab".

She added that the goal of organizing this day is to educate the public about the vital role of the laboratory through diagnosing their diseases and directing treatment to doctors along with methods of taking samples and answering their questions such as the reason for rejecting the sample and other medical inquiries that constitute a permanent question, as she also stated that the day targets the clinical doctors to raise their awareness with the types of tests available and the obstacles they may encounter.

Al-Adini commented that many people think that the role of medical labs is limited to blood drawing and analysis with a stereotyped image depicts that as soon as the blood sample is entered into a device the results will come, whereas medical labs is a science called "Laboratory Medicine", with many sub-specialties which is the case for KFHU medical labs where we find; hematology lab, histology lab, microbiology lab, and other various labs, and all these labs require separate specialized training. She also commented that they try their best to raise the awareness of community sectors with this issue mentioning that those who are in charge of the laboratories are unknown soldiers though the great

efforts they exert, and this why we were keen to display videos illustrate the journey of samples from the begin of the process of taking the sample till the result appears according to samples various types, whether blood, tissues or microorganisms.

Meanwhile she pointed out that the KFHU medical laboratories have recently witnessed huge developments, including expansion projects, besides the addition of modern tests, and new devices considered unique and rare in the Eastern Region for delivering quick and accurate results in record time. It is better mentioned that KFHU medical laboratories are accredited nationally by "CBHAI" and internationally by "CAP" and "JCI".

Moreover, Dr. Al-Adina indicated that the Medical Laboratory Directorate presented 27 lectures, 5 research studies, and trained 120 male and female trainees in 2021, mentioning that the directorate has 233 employees distributed in 13 departments examined more than 4 million samples.

7. IAU Announces Recruitment and Replacement of 653 Health Services Positions

Imam Abdulrahman bin Faisal University is pleased to announce the recruitment and replacement of 653 positions of Official Health Specialists jobs and Health Services Self-Employment Program jobs. The Job Competition will be for **10 days**, starting from **Sunday**, 05/04/1444 AH (corresponding to 30/10/2022 AD) at 08:00 am until **Tuesday**, 14/04/1444 AH (corresponding to 08/11/2022 AD) at 02:30 pm via the university's website.

For Application: <https://selfemp.iau.edu.sa/>

General Conditions

1. The applicant should be a Saudi citizen.
2. Should have received a bachelor's degree in the required specialty from a Saudi university or from a university recognized by the Ministry of Education.
3. The applicant should have a Professional Classification Certificate + Professional Registration ID from the Saudi Commission for Health Specialties.
4. The applicant should pass the scientific test set by the department to be nominated for the interview.

5. To pass the interview set by the University.

Instructions:

- Applying for the available positions is not considered a final nomination
- The applicant should first review the job vacancy list and determine the required department and specialization that is compatible with his/her qualifications.
- After determining the suitable position, the submission will be through filling out the job form via the Job Application Gateway on Imam Abdulrahman bin Faisal University's website. After completing the application, the applicant must log in to his/her personal account and upload all required documents.

8. Antibiotics Awareness Campaign

9. Diabetes Mellitus Awareness Campaign

The College of Clinical Pharmacy, represented by the Community Service Unit, in cooperation with the Student Club of the College of Clinical Pharmacy (Saydal), organized an awareness campaign about Diabetes Mellitus in Al-Othaim Mall in Dammam city from **11-12 February 2021**. More than 1,000 visitors visited the campaign, and volunteers performed 750 blood tests to measure the visitors' blood glucose level, along with raising the awareness about diabetes mellitus and how to prevent it. Large numbers of volunteers participated, including students from all academic years, interns, resident clinical pharmacists, and faculty members.

10. IAU Wins First Place in the National Toxicology Competition 2021

11. Drug Awareness Competition

The College of Pharmacy Wins 3rd Place in KSAPT21's Drug Awareness Competition

The 1st Drug Awareness Competition was held in the Kingdom of Saudi Arabia's Pharmacology and Toxicology (KSAPT 2021) conference.

Several Saudi universities participated in the competition, in which Othman Jamal Al-Lail and Osama Al-Saleem's teams won third place and were the youngest participants at the competition.

Their participation expressed the safe use of Bronchodilators and Cortisone medications and the difference between them. To deliver this awareness message to the public that are not specialized in the medical field, they made a video clip to communicate all ideas in a creative way.

The participants were subjected to several precise criteria and various qualifications. The competition was fierce among the students to present the best participation that contained a mixture of scientific, artistic, and social presentation.
