5. Infrastructure Exhibition by Interior Architecture

Dr. Mohammed Ahmed Helal Hapallas, the head of Interior Architecture Department mentioned that "this exhibition was held due to the importance of enriching the educational process and to elevate the outcomes of the department. Dr. Amro Abed the general coordinator of the exhibition pointed out that "this year's exhibition included more than 70 student educational experiment projects, it consisted of different designs, photography, product designing, paintings and freehand drawings, Islamic motif designs, product recycling, and the Maternity and Children Hospital in Al Qatif designing competition which was supervised by Dr. Imad Hamad. This was part of the department's role towards community responsibility. As well as that, the students provided explanations of their works, the stages and developments of different designs and how they are connected with the environment and the labor market.
