Asharqia Chamber holds a meeting about solid waste and its conversion from waste to treasure

22/12/2020

Asharqia Chamber holds a meeting about solid waste and its conversion from waste to treasure

Asharqia Chamber, represented by the Environment Committee, and in cooperation with Imam Abdulrahman Bin Faisal University, held a lecture on Monday, December 21, 2020, on solid waste and the advantages of its recycling, titled (Solid waste from waste to treasure), in which the Associate Professor of Solid Waste Management spoke And the head of the Environmental Engineering Department at Imam Abdulrahman bin Faisal University, Dr. Nawwaf bin Asim Balisi, and it was presented by the Chairman of the Environment Committee in the Asharqia Chamber, Professor Talal bin Sultan Al-Rasheed. Balisi said that solid waste, although it is considered one of the environmental problems, especially as it contributes to polluting the environmental elements of soil, water, and air, and includes a wide range of wastes that differ in quantitative and qualitative terms from one country to another according to the population density, economic situation and standard of living. Treating it is a great wealth that all countries tend to recycle and provide the best treatments to be re-exploited. Balisi explained that the waste recycling sector represents a very good investment, as it is one of the sectors rich in investment opportunities and encouragement to go into work in it, and that there is a general trend currently to increase waste recycling projects, noting that the Kingdom produces about 13 million tons of municipal waste that is collected from sources no industrial-like homes, and that recycling it has many benefits, whether environmental, economic or social, stressing that solid waste is actually like a treasure if you work to recycle it according to sustainability principles. Balisi emphasized that the work on converting waste into a treasure is governed by many considerations related to the environmental, economic, and social value that are the main pillars of sustainability. He pointed out that the 2030 vision gave the recycling of waste great importance, so the Saudi Investment Company for Recycling was established within its framework. It is one of the companies wholly owned by the Public Investment Fund, as part of a strong strategy to improve the standards of recycling and development to properly manage waste, to reduce its quantities, recycling, and reuse, and providing technical solutions to treat and dispose of them, by employing modern technologies to deal with them, which makes the future of this sector promising In front of that government awareness of the need for solutions for recycling and thus many investment opportunities, as well as employment in front of the national workforce.

Awareness lecture -IAU Faculty about: solid waste and its conversion from waste to treasure

Example of Programs to Reduce the Use of Paper and Plastic in Campus (Imam Abdulrahman Bin Faisal University, Saudi Arabia)

Description:

1. IAU Launces E-Morasalat system program -IAU reduce the use of paper and plastic

- IAU- IT supports paperless system to reduce paper in daily workplace. It can reduce a lot of paper use that mean Mahidol University can reduce CO2 emissions and save the world.
- Solutions of reusable paper in back office, e.g. using 2-side of paper, always recheck your data before print, use online system instead of hard copy.
- IAU- University has a policy of “Reduce Reuse plastic bag.

2. Solid waste management campaign-IAU

IAU are recognizes the importance of its societal role in working with its supply chain and help others to minimize waste generation and working in close with the authorities for waste collection. We are committed to good practice in reducing and managing waste effectively, innovatively and integrating the policy within all departments at all levels.

1. IAU use a new strategy for paperless documentation and fully transfer to electronic systems in all IAU documents and significant use of central printing systems tools in case of needs.
2. University has implemented policies and methods on paper and plastic usage reduction
3. such as two-sided paper printing, using reusable cups instead of plastic cups and printing when necessary.
4. The use of e-document system project for all university document-replacing paper document
5. such as e-meeting, e-evaluating, e-office for all IAU colleges and deanships.
6. Using e-learning channels for educational communication and teaching materials, instead of
7. using paper.
8. Using e-office channels as an electronic system for communication and announcement
9. among all faculty members instead of using paper such as e-document, e-learning, e-office and especially in circumstances of COVID -19 Pandemic
10. Scanning document in PDF file format replacing photocopying to reduce uses of paper.
11. Use of cloth mask in of COVID -19 Pandemic instead of plastic mask.

Webinars & enrichment events during summer semester amid COVID-19

The completion of the university’s technical infrastructure of devices, equipment, systems, live broadcast rooms and professional studios in the Deanship of E-Learning and Distance Learning, and preparing them for the use by the faculty and students, enabled the university to hold a series of virtual enrichment programs using the (Zoom program) and other systems and applications. The number of meetings and workshops, during virtual events, has exceeded 537 workshops and meetings, with a total of 972 continuous working hours, highlighted by HE. Dr. Abdullah Al-Rubaish, the President of Imam Abdulrahman Bin Faisal University (IAU).

Whereas the number of beneficiaries, among IAU employees, students, graduates and society, has exceeded 62,693; noting that the university is looking forward through monitoring and following up on societal needs to meet the directives of the IAU’s leadership and the aspirations of the Ministry of Education in developing

societal, technical, research and linguistic skills through innovative and modern methods linked to the university's original role in meeting national development requirements.

The Dean of E-Learning and Distance Learning, Dr. Munira Al-Mahashir, indicated the importance of the role that the university played during the pandemic, this summer, in providing many tributaries and options for learning and development for individuals and entities in partnership with government and private sector agencies. This has been achieved according to a scientific methodology emanating from the strategic plans and community partnerships of the university's vice-presidencies and colleges.

The distinguished role of the university's colleges and departments in expanding non-stop knowledge and scientific enrichment and enhancing the efficiency of optimal use of virtual reality in Community Service, even during the pandemic.

It is the fact that pandemic has changed the course of life in every sphere and higher education is not the exception, moreover our lives will never remain same even post covid-19, the earlier we accept this reality, we would be in better position to provide quality education to the millennial generation. The decision of providing IT related infrastructure and organizing series of virtual webinars, meetings & events on large scale is the testimony of visionary leadership of Imam Abdulrahman Bin Faisal University.

The University **Vice-Presidency for Studies, Development and Community Service** provided more than 23 workshops attended by more than 15,000 university graduates in its various colleges.

The **Vice-Presidency for Innovation and Entrepreneurship** undertook the second innovation camp in cooperation with the Saudi Enjaz Company, and the Entrepreneurial Clubs in universities in providing more than 32 enriching hours.

In addition, **Vice-Presidency for Postgraduate Studies and Scientific Research** represented by the Deanship of Scientific Research provided several workshops to develop and frame the university's research system, the most recent of which was the institutional financing workshop.

The **Institute for Medical Research and Consultation** also strengthened the search for talented people and supported them by providing 200 working hours and 19 workshops within a multi-disciplinary research program directed to search for talented male and female from various local and international universities.

Through the university's innovative enrichment programs, the **Deanship of Library Affairs** provided 19 workshops to enhance the skills of librarians in serving the beneficiaries through programs and service delivery systems in the university's libraries.

The Deanship of Community Service and Sustainable Development added to the university's activities a set of enrichment programs such as the **Safety and Disasters Prevention Program**, and disasters: brief overview delivered to the university health hostel guests. Moreover, the deanship provided a training program for sustainable development, the role of Saudi universities in cooperation with the Ministry of Planning and Economy, and the partnership with the **College of Design** to provide the first enriching virtual summer school for interested among Saudi male and female designers which was attended by more than 3,482.

The **Deanship of Student Affairs** conducted its summer enrichment program (virtually) including 29 hours of broadcasting for seven different enriching tracks.

The university's colleges have also strengthened community service and support for the developmental needs with a number of initiatives, such as **Aataa Initiative (virtually)** and a virtual support initiative for the College of

Arts, the **Inma Initiative for the College of Science**, the first summer enrichment program (**Tawaiq**) for the **College of Sciences and Humanities - Jubail**, **Sumo Club for the College of Sharia and Law**, and the Orientation Program for Intern Female Students in respiratory care for the **College of Applied Medical Sciences**.

It also provided the Summer of Administration 2020 program for the **College of Business**, and the **College of Education's** summer training program for employees of educational positions in the Eastern Province in cooperation with the **Continuing Education Center**.

The **Deanship of Distant Education and E-learning** assisted by providing their valuable technical support during covid19, they arranged various events, including number of meetings such as field training students' meetings at the **College of Applied Studies and Community Service**, the **Scientific Week in partnership between the College of Sciences and Humanities** and the Egyptian Scientific Research School, and the introductory meeting of the interns of the **College of Dentistry**, and the annual forum for the research of the interns which was supervised by the College of Dentistry.

Risk Management System

The university is passionate in adopting global best practices therefore gave importance to the Risk Management (RM) which has been discussed in university's strategic plan. It desires to include RM in its administration and activities. While implementing RM, it found the importance of electronic incident reporting therefore developed it as a risk management tool.

Keeping the purpose of system in view, the system has been named Hemaya (حماية)-an Arabic phrase meaning 'to Protect'. Hemaya has been launched on March 17, 2020 in the University, amidst lockdown situation in Saudi Arabia.

Lots of challenges has been encountered besides lockdown during the process of developing electronic incident reporting system which are worth to mention as:

- Bringing right people on the board to develop the function as passion
- Developing adequate knowledge on risk management - RM handbooks
- Making related knowledge available in English as well as in Arabic to benefit the native users.
- Identifying risk categories by benchmarking with global institutions. Indeed it took 6 months to consolidate knowledge on RM and to find key risk categories. At last identified seven categories of risks
- Organizing workshops on RM in colleges to build risk management culture
- Conducting barnstorming sessions in the colleges to identify various risks faced
- Conducting in-depth desk research on RM in HEI
- Developing an electronic incident reporting system to capture the events from various entities of IAU
- Putting the system on trials and further tests (by RMU and IT units)
- To avoid blame game culture, it has been decided to keep the reporter's identity confidential.

The advantage and benefits of Incident reporting system 'Hemaya' are as-

- System will build a culture of safety and security across the university thereby reducing any deviations thereby protecting people associated with the university (students, faculty, clinicians, administrative and supportive staff and visitors) from possible accidents or injuries as well as protect facilities or properties of latter from loss or damage.
- System ensures a consistent reporting, investigation and help in preventing the reoccurrence of incidents
- System will encourage self-criticism and prevent reoccurrence of risks
- System is a best practice in managing the risks.

سعادة عميدة عمادة خدمة المجتمع والتنمية المستدامة المحترمة السلام عليكم ورحمة الله وبركاته.

أهديكم أطيب تحية، وأشير إلى استضافة الجامعة لبرنامج موهبة الإثرائي الأكاديمي الصيفي 2021 بنظام التفرغ الجزئي لمدة ثلاثة أسابيع خلال الفترة من 3-21 ذو القعدة، والقرار الإداري لمعالي رئيس الجامعة رقم (57793) بتاريخ 1442/09/08هـ، بتشكيل اللجنة التوجيهية للبرنامج للعام 2021هـ، لتحقيق استضافة البرنامج وتنفيذه على الوجه الأمثل. ويتضمن النشاط المهاري في البرنامج عمل الطلاب والطالبات على مشاريع ستكون في (مدن المستقبل) وفق منهج التفكير التصميمي، في مجالات: الطاقة، الاتصالات، الصحة، السياحة والترفيه، وغيرها.

عليه، أمل ترشيحكم لتحدثين (رجل وسيدة) لعرض تجربة "سمايا" الحي السكني والاستدامة وجودة الحياة. حيث سيلهم العرض طلابنا وطالباتنا الواعدين بالوهبة، ويمكنهم من الربط بين الواقع والمشاريع التي يعملون عليها ضمن البرنامج المهاري. وللتنسيق أو الاستفسار/ يمكن التواصل مع نائب رئيس البرنامج للطلاب د. محمد بن عبدالرحمن القحطاني، maqhtani@iau.edu.sa جوال: 0505848693.

ولكم خالص التحية والتقدير، والله يراعاكم

سعادة الأستاذة الدكتورة/ فاطمة بنت عبدالله المعلم
عميدة عمادة خدمة المجتمع و التنمية المستدامة
حفظها الله .

السلام عليكم ورحمة الله وبركاته

بعد التحية والتقدير، من منطلق تحقيق هدف تعزيز المسؤوليات والشركات المجتمعية فيما يخص تحقيق أهداف التنمية المستدامة في الخطة الاستراتيجية لوكالة التنمية المستدامة، نحيطكم علماً أنه بعد الاجتماع مع مؤسسة الوليد الإنسانية تم طلب تعاون عن طريق عرض برنامج ممول بعنوان (مشروع برنامج كشفي- مرحلة الجواله- ضمن الجامعات السعودية ٢٠٢٠-٢٠٢١) وذلك لموائمة البرامج التطوعية في الجامعات السعودية مع إطار عمل المنظمة العالمية للحركة الكشفية لتحقيق أهداف التنمية المستدامة.

حيث وقع الاختيار على جامعة الإمام عبد الرحمن بن فيصل لتكون من ضمن الخمس جامعات الأولى التي يتم تطبيق البرنامج فيها، كما تم التواصل مع وكالة شؤون التنمية المستدامة بعمادة خدمة المجتمع لما لها من نشاط فعال على مستوى المنطقة والمملكة حالياً.

وعليه نأمل التكرم بالاطلاع على البرنامج والتوجيه بما ترونه مناسب

سائلين المولى عز وجل أن يوفقنا وإياكم على تحقيق الأهداف المنشودة من هذا التعاون.

وتقبلوا منا خالص التحية والتقدير ...

وكيلة العمادة لشؤون التنمية المستدامة
