Antibiotics Overview/ Systematic Review

Place of Activity	Zoom Platform
Date of activity	Saturday 20th of November, 2021.
Time of activity	4:00 pm – 7:00 pm
Number of attendees	50

The Alumni Unit of College of Medicine at IAU has held its 5th program of the academic year 2021-2022 titled “**Antibiotics Overview/ Systematic Review**” through “**ZOOM**” platform. It was presented by the outstanding intern Dr. Ali Almajid on Saturday the 20th of November 2021. The targeted audience were all the medical students in different levels and interns. The aim was to fulfil the gap by increasing the understanding of antibiotics in a creative summarized manner with the focus on most commonly used medications at current time. The audience were a total of 50 students and interns. An evaluation survey was shared at the end to improve and develop better future programs. Attached below are photos from the evaluation survey.

Program Organizers:

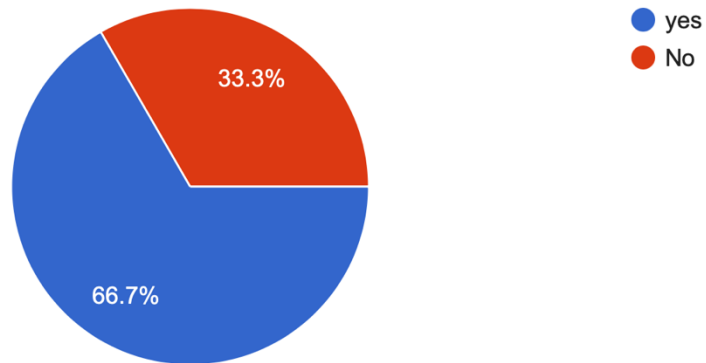

Shahad Alabdulqader and Areen Alamri.

Presenter:

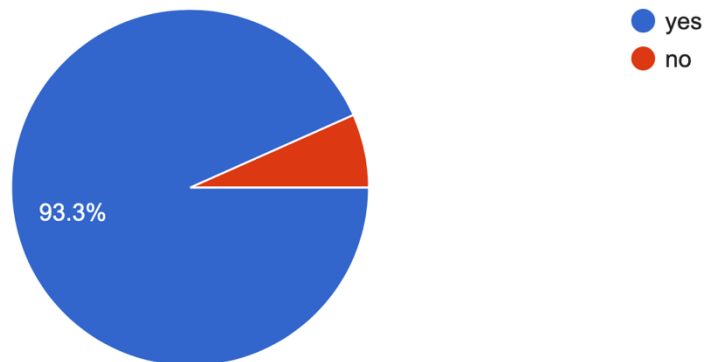

Dr. Ali Almajid

EVALUATION SURVEY

Was the time suitable?

Did you benefit from the lecture?

Lecture Advantages:

Clear, summarized, to the point

Perfect

Focus on high yield information

Excellent lectures

Simple language

It cover alot about Antibiotics and relation to bacteria

To know what appropriate antibiotic for specific bacteria?

The sequence the lecture was given and the background was quite helpful.

I loved how it was clinical oriented more than just recalling

The case questions were quite helpful and the presenter questions were thoughts stimulating

I enjoyed every bit of it and lost track of time even.

Excellent explanation of the antibiotics and the uses of each ones.

Comprehensive

Informative lecture

It was organized and informative

The doctor is emphasizing on the most commonest questions regarding the objectives

Thorough

Has all important information and he started with some basics first

Lecture Disadvantages:

Nothing

Not all info dr Ali mentioned was written, but whatever written was amazing enough, i hope you upload the video soon we will really benefit from it! Thank youuu for this amazing lecture!

Nothing

It should be divided into more than one lecture

Need more time or multiple sessions

I think it is better to devide the lecure in 3 days, because it is mind blowing

Noneee

None except only a minor tweak in improving the introduction to the basics.

I think its too complicated for 5th year and below, even me had some difficulty understanding some parts of the lecture

The time was not enough, if i may suggest making it 2 sessions on 2 days each lasts 2 hours this may help in getting the maximum benefit out of the lecture. Thank you

The lack of pictures to clarify and illustrate certain things

Complicated for students

Time was not enough
