Welcome Message

Dear Nursing Interns:

Welcome to the internship period, and big congratulations for the achievement of the academic requirements in the College of Nursing, at Imam Abdulrahman Bin Faisal University.

During your internship, you will be able to expose to different clinical settings and practice lots of nursing procedures which are efficient and vital for your carrier.

It is a pleasure for us in the Clinical Affair presented by Internship Unit to support you and guide your practical journey.

Thanks a lot, and Kind Regards

Vice-Dean Clinical Affairs

INTRODUCTION TO INTERNSHIP PROGRAM

Introduction:

Following successful completion of the four years in the undergraduate nursing program, the student must spend 52 weeks of hospital based internship period in a recognized hospital, that can offers a proper training areas to meets the objectives of the internship program.

This period of practical managerial and theoretical experience will enable the graduate to acquire more competency and experience to perform as an independent nurse specialist (per Saudi council for health specialties accreditation) and as a first level nursing manager, and will enable student to adjust to the real practical life in different units in the hospital settings.

By the successful completion of this internship period, the graduate is expected to fulfill the objectives of the program and will be awarded the certificate.

Vision

To be an innovative cornerstone of nursing education nationally, regionally and internationally through the use of technology within a caring context.

Mission

To offer a dynamic, comprehensive and innovative educational experience that will enable students to expand their nursing knowledge and enhance their professional skills in order to meet the health care needs of the community within the context of Islamic culture, beliefs and values.

Goals

1. Provide quality education in nursing for Saudi nurses who graduate with high scientific and clinical competencies.
2. Utilize concepts from the humanities and behavioral sciences in the nursing practice.
3. Practice legal and ethical standards of the nursing profession.
4. Develop professional knowledge and practice through a problem-solving approach and evidence-based learning.
5. Utilize electronic administration and health information resources.
6. Apply leadership and managerial skills to attain quality care.
7. Focus on the commitment to the principle of “lifelong learning”.

Values

- Comply with and incorporate Islamic and community beliefs with the ethics of the profession.
- Quality performance.
- Development of confidence.
- Transparency.
- Pursuit of self-education.

Objectives

The graduates will be able to:

- Provide competent and culturally sensitive nursing services in response to the changing needs of the society and in accordance with both legal and ethical standards.
- Communicate effectively with clients, family and other health professionals.
- Use critical thinking, problem solving and scientific inquiry in the practice of nursing and in monitoring and ensuring the quality of health care.
- Use their nursing knowledge and skills in partnership with clients and families in order to maintain and promote health and wellbeing as well as provide care and support during illness.
- Implement the Standards of Nursing Practice.
- Use different approaches to assess, protect and promote the health of the community.
- Meet challenges produced by ongoing changes in the provision of health care.
- Participate in the preventive, promotive, curative, rehabilitative and supportive services.
- Demonstrate care by utilizing theory and evidence based nursing interventions.
- Collaborate with clients and other health professionals to provide culturally sensitive nursing care.
- Appreciate how specific environments and socio-political, cultural and historical conditions affect health behavior, professional practice and public policy.
- Apply leadership and managerial skills to attain quality care for clients and quality of the working environment for co-workers.
- Engage in self-directed, life-long learning, reflective and evidence-based practice.

Practice Competencies

1. Uses advanced comprehensive assessment, diagnostic, treatment planning, implementation and evaluation skills
2. Documents assessment diagnosis, management and monitors treatment and follow-up care in partnership with the patient
3. Uses applicable communication, counseling, advocacy and interpersonal skills to initiate, develop, and discontinue therapeutic relationships
4. Refers to and accept referral from other health care professionals to maintain continuity of care.
5. Practices independently where authorized and the regulatory framework allows in the interest of the patients, families, and communities
6. Works in collaboration with health team members in the interest of the patient
7. Develops a practice that is based on current scientific evidence and incorporated into the health management of patient, families, and communities
8. Uses research to produce evidence-based practice to improve the safety, efficiency and effectiveness of care.
9. Engages in ethical practice in all aspects of the registered nurse role responsibility.
10. Creates and maintains a safe therapeutic environment through the use of risk management strategies and quality improvement.

11. Assume leadership and management responsibilities in the delivery of efficient practice nursing services in a changing health care system
12. Introduce tests, evaluates, and manages evidence-based practice.
13. Acts as an advocate for patients in the health care system and in the development of health policies that promote and protect the individual patient, family and community.

ORIENTATION PROGRAM

Overall purpose:

To provide new interns with **one-week General hospital orientation which offered by hospital staff and internship unit in the college** to practice nursing care in a safe environment, which is in accordance with the goals and objectives of the nursing internship program.

Objectives:

On completion of the orientation program each intern is expected to understand the following regulations about:

The Hospital:

SAUDI NURSING LICENSING EXAM COMMITTEE

INTRODUCTION:

The purpose of the Saudi Nursing Licensing Exam Committee is to assure that the graduating nursing students of CON, IAU successfully pass the Saudi Nursing Licensing Exam (SNLE) mandated by the Saudi Commission for Health Specialties (SCHS). Main objectives of the Committee are (a) Plan and conduct a self – study of the current practices at the CON, IAU with respect to preparing students for SNLE (b) Adopt best practices in national and international universities in the same domain and (c) Prioritize recommendations to improve CON, IAU practices for SNLE.

The role of the Committee involves the responsibility of carrying out student review, assessment and SNLE preparation services. Passing the SNLE for Saudi nursing graduates promises a bright opportunity in getting admission for Postgraduate Nursing Program at the Saudi Commission for Health Specialties or practicing a nursing profession in the academic or hospital background.

Unit Charges:

1. Orient graduating students on the Saudi Nursing Licensing Exam applicant guide to ensure proper guidance on the step by step application SNLE process.
2. Explain and ensure full understanding of graduating students on the guide, policies and procedures contained in the SNLE Applicant Guide.
3. Provide Consultation Services and professional presentation/Content development related to consultation topics/modules on SNLE.
4. Develop virtual and on-site workshops with a focus on SNLE preparations/review.
5. Represent the CON, IAU for any meeting(s), conference or workshops initiated by the SNLE Central Committee who continually reviews the outline ensuring the content of SNLE Examination is relevant to the nursing practice. Arrange orientation sessions / workshops regarding SNLE for CON, IAU Students
6. Contribute to the standard setting for the Saudi Nursing Licensure Examination in achieving an acceptable level of performance of the CON, IAU graduates that represents the institution as a whole.
7. Review the curriculum periodically for appropriateness of SNLE content and recommend changes in the curriculum accordingly for approval.
8. Align learning outcomes with SNLE.
9. Track statistics of the college graduates who have passed the SNLE (first timers and repeaters).
10. Recommend collaborative agreements between the College/University and local professional examination bodies (Saudi Commissions for Health Specialist).

GRADUATE ATTRIBUTES

1. Uses advanced comprehensive assessment, diagnostic, treatment planning, implementation and evaluation skills in monitoring the treatment and following-up care in partnership with the patient
2. Uses applicable communication, counseling, advocacy and interpersonal skills to initiate, develop, and discontinue therapeutic relationships
3. Refers and works in collaboration with health team members in the interest of the patient to maintain continuity of care
4. Practices independently where authorized and the regulatory framework allows in the interest of the patients, families, and communities and engages in ethical practice in all aspects of the registered nurse role responsibility.
5. Develops a practice that produces evidence-based practice to improve the safety, efficiency and effectiveness of care.
6. Creates and maintains a safe therapeutic environment with risk management strategies and quality improvement.
7. Assume leadership and management responsibilities in the delivery of efficient practice nursing services in a changing health care system.
8. Acts as an advocate for patients in the health care system and in the development of health policies that promote and protect the individual patient, family and community

CLINICAL OBJECTIVES FOR GENERAL UNITS

SURGICAL UNITS

General Objectives:

Upon the completion of this training period in surgical units, the intern student will be able to:

1. Fulfill all the requirements for patient's admission.
2. Use nursing process as a frame work for care of patients with surgical problems
3. Perform comprehensive pre-operative assessment
4. Apply aseptic technique principles while caring for surgical patient
5. Implement pre-operative nursing measures that decrease the risk for infection & other post-operative complications
6. Examine surgical patient physically, psychologically & mentally immediately before surgery
7. Utilize health teaching to promote patient's recovery from anesthesia & surgery thus preventing post-operative complications
8. Endorse the patient to Operating Room (OR) following hospital policy
9. Receive the patient from OR following the criteria according to hospital policy
10. Identify common post-operative problems& their management
11. Perform post-operative assessment for early detection of post-operative need and complications through early detection and their nursing management.
12. Demonstrate the following procedures:
 - a. Wound dressing
 - b. O₂ therapy
 - c. I. V. therapy
 - d. Medication administration
 - e. NGT insertion, feeding irrigation and removal, gavage and lavage
 - f. Insert / maintain catheter, straight and indwelling
 - g. Suctioning techniques
13. Monitor & document the following:
 - a. Vital signs
 - b. Skin status
 - c. Pain
 - d. Level of consciousness
 - e. Surgical site & wound drainage system. Drainage Tubes
 - f. I.V. Sites
 - g. Urine Output
14. Evaluate patient's condition & outcome
15. Utilize information to patient & family before discharge.
16. Exhibit behavior that is based on ethical and moral conduct of professional nursing.

MEDICAL UNITS

General objectives:

Upon completion of this training period in the medical units, the intern student will be able to:

1. Fulfill all the requirements for patient's admission
2. Use nursing process as a framework for care of patients with medical problems
3. Assess patient's needs & problems
4. Plan nursing actions to meet patients need & solve patient's problems
5. Implement nursing skills related to patient's care safely & efficiently
6. Evaluate & modify the plan of care based on observable responses of patients & attainment of patient's goals
7. Provide health education to patients & their families
8. Prepare and Administer medication safely & correctly
9. Perform the following nursing procedures:
 - a. IV therapy
 - b. Blood extraction
 - c. O₂ therapy
 - d. Nebulization
 - e. Capillary testing of glucose
 - f. Suctioning techniques
 - g. NGT insertion, feeding & removal
 - h. Female urethral catheterization (if allowed)
 - i. Carryout prescribed treatment
10. Exhibit behavior that is based on ethical & moral conducts of professional nursing
11. Documentation of nursing notes
12. Follow guidelines of infection control to guard against potentially of transmission.

PEDIATRIC UNITS

General Objectives:

1. Perform physical assessment of pediatric patients
2. Management of pediatric patient with respiratory problems:
 - a. Airways (oral and nasal)
 - b. Tracheostomy
 - c. Suctioning (oral, nasal, and tracheostomy)
3. Initiate and maintain oxygen therapy using:
 - a. Face mask
 - b. Nasal cannula
 - c. Oxyhood
 - d. Oxygen tent / croupette
 - e. Oxygen humidifier
4. Initiate and maintain Cardio-Pulmonary Resuscitation (CPR)
5. Maintain nutritional status:
 - a. Bottle feeding
 - b. Syringe feeding
 - c. Tube feeding (nasogastric)
 - d. Gastrostomy feeding
6. Calculate dosage of and administer medication to the pediatric patient including vaccines, e.g. PPD:
 - a. Oral
 - b. Parenteral
 - c. Push using voluntrol
7. Utilize knowledge of communicable diseases
8. Assist with special procedure (Diagnostic or therapeutic)
9. Care of pediatric surgical patient pre-and post op including cases with:
 - a. Chest tube
 - b. Wound drainage device, e.g. hemovac
 - c. Suprapubic catheter
 - d. Gastric drainage
 - e. Skin and skeletal traction
10. Care of pediatric diabetic patient including diabetic teaching
11. Apply knowledge of isolation techniques/universal precautions
12. Monitor L V. using control device, e.g. ivac
13. Manage TPN using line for hyperalimentation
14. Administer blood and blood products
15. Administer and/or monitor administration of chemotherapy drugs
16. Assist with bone marrow aspiration Care of chronically disable child.

OBSTETRICS AND GYNECOLOGY UNITS

General Objectives:

1. Recognize need to initiate and maintain CPR
2. Provide pre-and post op teaching to OB/Gyne Patient
3. Participate in diabetic teaching
4. Participate in discharge planning / teaching
5. Assist/ instruct mothers with breast care and breast feeding
6. Prepare patient for diagnostic / therapeutic procedures/ e.g. (Amniocentesis, U/S)
7. Insert / maintain catheter, straight and indwelling
8. Administer blood and blood product
9. Maintain I.V. using infusion control devices
10. Initiate current infection control techniques including isolation
11. Perform venipuncture for blood sampling
12. Detect fetal heart using sonic aid or cardiographic monitor (CTG) Or Doppler
13. Care of post critical patients
14. Promote infant / parent' bonding
15. Perform fetal monitoring techniques
16. Assessment and management of the newborn
17. Perform Apgar scoring of the newborn
18. Apply emergency resuscitation of the newborn.
19. Management of initial critical newborn.

Ante Partum Care:

1. Estimate gestational age
2. Palpate abdomen
3. Locate fetal heart tones

Care of Patient in Labor:

1. Assist in Vaginal Exam
2. Monitor progress
3. Assist in artificial rupture of membrane
4. Care of patient with internal fetal electrode
5. Assist in epidural insertion
6. Care of patient under epidural anesthesia

Care During and After Delivery:

1. Positioning patient
2. Conducting/ assisting delivery (normal spontaneous delivery, forceps, vacuum, etc.)
3. Checking funds, massage
4. Observe lochia
5. Assess of postpartum
6. Care of episiotomy

PRIMARY HEALTH CARE SERVICES

Family and Community Health Center (FAMCO)

General Objectives:

To identify the services provided by PHC.

Specific objectives:

By the end of this experience in the primary health care center, nursing intern will be able to:

1. Explain the importance of primary health care (PHC)
2. Apply health education to client/family according to their needs
3. Demonstrate nursing care and health teaching for patient attending clinic with endemic disease or infectious diseases.
4. Practice maternal and child health services care including family planning.
5. Apply the principle of evidence-based nursing practice in problem solving and decision making.

Maternal and Child Health (MCH):

General Objectives:

To recognize the role of MCH in Women and children health.

Specific objectives:

1. Describe MCH program.
2. Identify the MCH services for maternal care during premarital care, prenatal, antenatal and postnatal care.
3. Identify high risk pregnant mothers.
4. Define the health problems & needs related to children less than 5 years.
5. Monitor growth and development of children aged newborn – 5 years.
6. Conduct the nursing assessment, intervention & health teaching for well and sick child.
7. Apply the immunization according to the MOH schedule.
8. Identify incidence & prevalence of health problems in the community.
9. Discuss the role of family and community health nurse in MCH center.

CLINICAL OBJECTIVES FOR NURSING MANAGEMENT

AS A HEAD NURSE

Aim:

Participate in maintain quality and standards of nursing care in the unit.

Patient Care Management:

Participate in providing total, comprehensive, individualized patient care in the unit.

Staff Management:

Participate and evaluates performance of personnel in the unit.

1. Participates of orientation of new employees.
2. Monitors quality of nursing activities.
3. Conduct nursing rounds, conferences, & demonstrations.
4. Attend with nursing staff medical rounds.
5. Establish harmonious relationship with staff.
6. Shares in committee and attends meeting.

Unit Management:

1. Participate in managing adequate supplies and equipment in the unit.
 - a. Utilize the procedure for managing equipment and supplies.
 - b. Controlling the use of supplies and equipment.
 - c. Utilize the inventory list correctly.
 - d. Fill different formats for ordering supplies and equipment.
 - e. Report and follow maintenance needs.
 - f. Maintain a stable standard for equipment and supplies for emergency use.
2. Participate in documenting unit information.
 - a. Write shift report.
 - b. Write census report.
 - c. Maintain patient clinical record complete and accurate.
 - d. Perform unit statistics.
 - e. Write an incident report.
3. Maintain safe and clean environment.
 - a. Provide safety measures.
 - b. Provision of clean environment.
 - c. Teach personnel, patients and relatives about the safety measures.
4. Coordination of patient care services, coordination with other departments (serving units) such as laboratory, physiotherapy, etc.

AS A NURSING SUPERVISOR

4. Monitors and evaluates clinical performance of nursing personnel on assigned unit.
5. Accepts the 24-hour Patient's Report (Supervisor's Report) at the beginning of the shift and submits the report to the evening off- shift supervisors at the end of the shift after reviewing the patient-care information entered by the Head Nurse.
6. Attends to patient complaints **personally** and follows up on events which occurred during the off-shift.

Staff Management:

1. Maintains close and continuous communication with the Nursing Services administrators on every matter concerning staffing and assigned nursing personnel.
2. Monitors and adjusts staffing patterns to improve unit productivity.
3. Reports all leaves (absences, sick leaves, planned emergency leaves, etc.) direct to the Nursing Services administrators
4. Prepares the monthly duty schedule for nursing personnel of the designated unit.
5. Prepares the annual vacation plan.
6. Prepares all staff evaluations for assigned nursing personnel on an annual basis.
7. Conducts regular monthly staff meetings with the unit staff.
8. Maintains minutes of staff meetings.
9. Encourage professional self-development within assigned nursing personnel.

Unit Management:

1. Ensures that all supply par levels are always satisfied.
2. Determines the unit requirements for equipment or materials.
3. Ensures that infection control measures are understood by nursing personnel..
4. Ensures that the overall environment is conducive to the safety of patients, visitors and personnel.
5. Personally oversees incident reporting procedures, countersigns the report

CLINICAL OBJECTIVES FOR ELECTIVE UNITS

HEMODIALYSIS AND PERITONEAL DIALYSIS UNITS

Aim:

To obtain a clinical experience in assessing, planning and evaluating the outcomes conservative and renal replacement therapies in acute and chronic renal failure and to understanding the special needs of these patients

General Objectives (hemodialysis unit)

1. Understanding the principles of HD machines.
2. Evaluating the dialysate and dialyzers needed for specific patients.
3. Overall pre-dialysis assessment:
 - a. Physical assessment
 - b. Blood pressure
 - c. Concept of "Dry weight"
 - d. Psychological needs
 - e. Laboratory data
4. Planning the HD treatment according to the patient's needs.
5. Assessment of the patient's vascular access for HD.
6. Observing the process of cannulation and connection to the HD machine.
7. Performing ongoing patient monitoring and surveillance during the dialysis session.
8. Understanding the required auditing methods used in the nephrology unit.
9. Recognizing all the common complementary (medical, nutritional etc.) treatment given to the patient before, during and after the dialysis treatment.
10. Observing the process of disconnection from dialysis treatment.
11. Monitoring and evaluating dialysis treatment outcomes.
12. Assessing the patient's quality of life.
13. Considering rehabilitation factors in the patient's everyday activities.

General Objectives (Peritoneal dialysis unit):

1. Recognizing the contraindications to PD (why PD may not be suitable for some patients)
2. Learning the different peritoneal access methods.
3. Understanding the principles of peritoneal dialysis.
4. Recognizing the variety of PD methods (acute, IPD, CAPD, APD)
5. Assessing the PD method of choice to the patient's needs.
6. Understanding the PD patient education program.
7. Recognizing the variety of PD solutions and their suitability to patient need.
8. Performing assessment of the patient's "dry weight", blood pressure, edema, laboratory findings, and nutritional status.
9. Assessing the exit site and tunnel for signs of infection.
10. Assessing the drained fluids for signs of infection, bleeding or any other complication.

11. Learning the differential diagnosis of peritonitis or any other complications .
12. Learning the unit protocol for treating peritonitis.
13. Evaluating treatment outcomes.
14. Assessing the patient's quality of life.
15. Considering rehabilitation factors in the patient's everyday activities.

CLINICAL OBJECTIVES FOR EMERGENCY ROOM

Purpose:

To provide the graduate nurse interns with the opportunity to increase his basic nursing skills when applying the nursing process to the care of patients in emergency situations.

General Objectives:

By the end of this placement the nurse intern will be able to:

1. Acquire competency in assessing patients in emergency (complete a primary survey and secondary survey).
2. Demonstrate skills in performing physical assessment of patients in emergency situations.
3. Intervene in situations where life support systems are threatened and provide emergency care in compliance with unit regulatory policies and practice.
4. Perform nursing interventions appropriate to patients in emergency situations.
5. Demonstrate a level of communication appropriate for emergency room functioning and practices.
6. Identify different ER area /rooms and the responsibility of the nurse in each room.
7. Perform complete physical assessment for any emergency case.
8. Triage the patients according to the type of severity of their presenting manifestation using the universal five levels scale
9. Recognize life-threatening problems and know how to intervene accordingly.
10. Apply strict guidelines of infection control to guard against potentially disease transmission.
11. Perform emergency room procedures and care under the direct supervision of the charge nurse.
12. Identify common ER medication, their action, indications, contraindications, adverse effects and nursing consideration for each one.
13. Identify ER equipment and supplies and the location of them in each ER area.
14. Determine the Crash Cart's contents and their uses.
15. Identify the nurse's roles in Code 99 and the principle of CPR.
16. Identify the different types of intravenous fluids and their indications.
17. Perform ECG for emergency patients and recognize major abnormalities in it.
18. Observe and assist the physicians and ER nurses in surgical sutures and casts under supervision of the charge nurse.
19. Perform wound dressing and assessment
20. Administer ER medication under the direct supervision of the charge nurse.
21. Give instructions and health education for emergency patient

CRITICAL CARE UNITS

Purpose:

To provide the nurse intern with the opportunity to increase his basic nursing skills when applying nursing process to the care of patients in critical care settings.

General Objectives:

By the end of this experience, the nurse intern will be able to:

1. Acquire competency in performing complete physical assessment of patients in critical care unit.
2. Perform appropriate nursing interventions to patients in critical care units.
3. Demonstrate competency in performing special procedures required in the critical care unit.
4. Identify critical care unit protocols in performing procedures and administering medications.
5. Communicate appropriately with patients and critical care team.
6. Apply protocol by nurse intern for patient with the following requirements:
 - a. Oxygen therapy
 - b. Arterial blood gases analysis
 - c. Endotracheal / Nasotracheal intubation
 - d. Endotracheal / Nasotracheal suctioning
 - e. Tracheostomy care
 - f. Mechanical ventilation
 - g. Chest tube
 - h. Continuous cardiac monitoring
 - i. Cardiac arrhythmia interpretation
 - j. Alternative management therapies in cardiac care
 - k. Hemodynamic monitoring
 - l. Arterial pressure monitoring
 - m. Pulmonary artery pressure monitoring
 - n. Central venous pressure monitoring
 - o. Cardiac output determination
 - p. Intra cranial pressure monitoring
 - q. Patient controlled analgesia
 - r. An epidural catheter

OPERATING ROOM

Purpose:

To provide the graduate nurse intern with the opportunity to develop basic competency and implement the technical aspects of preoperative care.

General Objectives:

At the end of this experience the nurse intern will be able to:

1. Demonstrate skills and knowledge pertinent to the operating room techniques and practices.
2. Demonstrate skills in arranging sterile setups for various types of surgeries including preparation of instruments, equipment, material and supplies.
3. Apply operating room nursing interventions appropriate to the care of patients during preoperative period.
4. Perform efficiently assigned duties related to circulating and/or scrubbing nursing roles.
5. Demonstrate skill in the safety use and handling of equipment, materials and supplies during the intra operative period.
6. Monitor and maintain the quality of the environment according to operating theatre policies and practices.
7. Become aware of the legal responsibilities involved in administering care to the patient undergoing surgical interventions.

The presentation will be done using PowerPoint and must observe the following:

1. A clear and concise introduction to the topic.
2. Aims and outcomes of the presentation.
3. Clear, readable English writing and grammar.
4. Conclusions and recommendations.
5. Current evidence from research (references and proper citation).
6. Presentation time is 15 minutes minimum and 20 minutes maximum

Case Presentation or Project Evaluation

Topic: -----

Method of Presentation: -----

(Indicate: lecture, demonstration, case presentation, bedside conference, reading journal, film showing, etc.)

Note: Each specialty should have its own presentation; the topic should be submitted in the **first week** of the specialty rotation and presented in the **last week** of orientation, a written proposal or a copy should be submitted one week prior to the presentation to the concerned area manager.

| Performance Items | | P | G | VG | E |
|---|--|---|---|----|---|
| I. Application of scientific knowledge and principle | | 1 | 2 | 3 | 4 |
| 1. Demonstrates knowledge of nursing process in delivering patient care by: | | | | | |
| a. Assessing patient needs. | | | | | |
| b. Setting goals to meet the needs. | | | | | |
| c. Planning patient care based on priorities. | | | | | |
| d. Implementing the developed plan. | | | | | |
| e. Evaluating outcomes and reassessing the patient. | | | | | |
| 2. Integrating knowledge of physiological, psychological and sociological into patient care. | | | | | |
| II. Quality of work | | 1 | 2 | 3 | 4 |
| 1. Work within standards of nursing care practices, policies and procedures and established protocols for the unit. | | | | | |
| 2. Performs independent nursing action according to patient needs. | | | | | |
| 3. Priorities the patient care in consideration with the overall assignments in the units. | | | | | |
| 4. Demonstrates confidence and safety in the performance of nursing procedures. | | | | | |
| II. Communication skills | | 1 | 2 | 3 | 4 |
| 1. Maintains good interpersonal relationship with the co-workers. | | | | | |
| 2. Accepts constructive feedback from preceptor and other staff. | | | | | |
| 3. Request assistance of preceptor or designee when faced with managerial or clinical problem. | | | | | |
| 4. Responds appropriately to patients and families questions, concerns, and request. | | | | | |
| III. Documentation | | 1 | 2 | 3 | 4 |

| | | | | | |
|---|--|---|---|---|-----|
| Demonstrates competence in documenting patient care, and maintain a Complete, accurate and concise. | | | | | |
| IV. Professionalism | | 1 | 2 | 3 | 4 |
| 1. Adheres to professional and ethical standards when dealing with patients and health care team members. | | | | | |
| 2. Punctuality: Reports to work on time, maintains good attendance record and completes given assignment on time. | | | | | |
| 3. Adheres to dress code and maintain professional appearance. | | | | | |
| 4. Demonstrate positive attitude toward nursing care. | | | | | |
| 5. Shows initiative to learn and seek new learning opportunities. | | | | | |
| V. Health Education | | 1 | 2 | 3 | 4 |
| 1. Promotes positive environment for health teaching. | | | | | |
| 2. Provides effective education based on needs. | | | | | |
| 3. Evaluate the effectiveness of teaching. | | | | | |
| VI. Case presentation | | 2 | 4 | 6 | 8 |
| 1. Performs case presentation within the framework of nursing process. | | | | | |

Intern Name:
 Unit: Batch#: Group:

| CLINICAL SKILL/TASK | 1 | 2 | 3 |
|--|---|---|---|
| 1. Familiarize with the physical set up of the unit specifically the rooms of the following with their checklists: | | | |
| a. Staff locker | | | |
| b. Male/Female changing rooms | | | |
| d. Stock room | | | |
| 2. Read and understand policies & procedures including job description. | | | |
| 3. Familiarize with international patient safety goals (IPSG) | | | |
| 4. Knows the location of the fire evacuation plan, fire extinguishers and fire alarm and to respond thru RACE and PASS | | | |
| 5. Familiarize with unit disaster plan with its roles and responsibilities | | | |
| 6. Familiarize with unit KPI: Patient Fall Prevention and Nurse turn over. | | | |
| 7. Daily checking for the instrument and equipment such as crash cart IVAC (portable IV pump), glucometer, TCOM (transcutaneous oximetry) machine...etc. are available and in good condition with updated PPM (planned preventive maintenance). | | | |
| 8. Knows how to locate the attendance sheet, duty ROTA, telephone directory | | | |
| 9. Admission, Transfer and discharge: The Nurse Intern is able to demonstrate the following : | | | |
| • The routine admission transfer and discharge of a patient | | | |
| • The care of a patient valuable | | | |
| 10. Diagnostic Investigation & Procedures The Nurse Intern is able to assist with safe preparation, and post procedural care of the patient for following procedures | | | |
| • X-ray procedure | | | |
| • Upper GI Series Barium Swallow | | | |
| • Lower GI Series Barium Enema | | | |
| • IVP/ Excretory Urography | | | |
| • Cholecystography | | | |
| • CT Scan | | | |
| • MRI | | | |
| • ERCP | | | |
| • Endoscopy | | | |
| • ESWL procedures | | | |
| • Fluoroscopy | | | |

| | | | |
|---|--|--|--|
| • Ultrasound | | | |
| • Nuclear medicine | | | |
| • Angiogram | | | |
| • Renogram | | | |
| Biopsies | | | |
| • Lumber puncture | | | |
| • Sternal Puncture | | | |
| • Liver | | | |
| • Bone Marrow aspiration | | | |
| • Breast FN biopsy | | | |
| 11. Diabetes Management | | | |
| • Insulin Therapy | | | |
| - Single type | | | |
| - Mixed insulin | | | |
| - Insulin infusion | | | |
| - Diabetic diet | | | |
| • Glucose monitoring | | | |
| - Blood glucose devices (e.g. glucometer) | | | |
| - Urinary glucose & ketone testing | | | |
| • Foot care | | | |
| • Patient/family teaching | | | |
| 12. Cardiac Management The Nurse Intern is able to discuss the policy & competently complete the following activities | | | |
| • ECG recording/interpretation | | | |
| • Cardiac monitor | | | |
| • Performing basic rhythm strip measurements | | | |
| • Recognizing basic and life threatening dysrhythmias | | | |
| • Care of patient with pacemaker | | | |
| • Use of dopplers | | | |
| • Defibrillation | | | |
| • Cardioversion | | | |
| • Cardiac medications | | | |
| • Administration of Nitrates (oral, topical) | | | |
| • Administration of Anti arrhythmias (oral) | | | |
| • Administration of Anti-hypertensive | | | |
| • Pre & Post-operative care | | | |
| • Patient and family teaching | | | |
| 13. Oncology/ Haematology Care The Nurse Intern is able to discuss the policy & competently complete the following activities | | | |
| Blood transfusion | | | |
| • The requirements related to the initiation of a transfusion | | | |
| • The actions & documentation required in the incidence of blood transfusion reaction | | | |
| • Patient Teaching | | | |
| Able to administer | | | |
| • PRBs | | | |

| | | | |
|---|--|--|--|
| • Whole Blood | | | |
| • Platelets | | | |
| • Fresh Frozen Plasma | | | |
| • Cryoprecipitate | | | |
| • Heparin Sodium/Side effects/Contraindications | | | |
| • Antidote – Protamine Sulphate & its action | | | |
| • Coumadin (Warfarin)/Side Effects/ Contraindications | | | |
| • Antidote – Vitamin K & its action | | | |
| • Heparin therapy | | | |
| • Chemotherapy medications/Administration of Cytotoxic Agents | | | |
| • Patient Teaching | | | |
| 14. Neuro Management The Nurse Intern is able to demonstrate the following activities | | | |
| • Assessing level of consciousness | | | |
| • Using the Galscow Coma Scale | | | |
| • Neuro-vascular nursing | | | |
| - Colour | | | |
| - Warmth | | | |
| - Movements | | | |
| - Sensations | | | |
| • Seizure Precautions & Observation | | | |
| • Administering anticonvulsants drugs | | | |
| • Management of the unconscious patient | | | |
| • Care of patient with | | | |
| - CVA | | | |
| - Spinal cord injury | | | |
| - Neuromuscular diseases | | | |
| - Pre & Post-operative care | | | |
| 15. Renal/Urologic Management The Nurse Intern is able to discuss the policy & demonstrate the following activities: | | | |
| • Insertion of an indwelling catheter (female only) | | | |
| • Continuous care of an indwelling catheter | | | |
| • Care of patient with an ileal conduit | | | |
| • Maintenance of continuous bladder irrigation | | | |
| • Bladder Ultrasonography | | | |
| Care of Patient with peritoneal/ haemodialysis | | | |
| • The Pre & Post-operative care of AVF & AVG | | | |
| • Care and maintenance of exit sites for peritoneal dialysis | | | |
| • Preparation of a patient for haemodialysis | | | |
| • Testing the haemodialysis machine for safety alarm | | | |
| • Checks prior to dialyzing a patient | | | |
| • Patient monitoring during dialysis | | | |
| 16. Orthopedic Nursing care The Nurse Intern is able to discuss the policy & competently complete the following activities: | | | |
| • Maintenance and care of tractions | | | |

| | | | |
|---|--|--|--|
| <ul style="list-style-type: none"> • Maintenance and care of splints | | | |
| <ul style="list-style-type: none"> • Plaster Cast Care: <ul style="list-style-type: none"> - Equipment - Implementation - Nursing Care | | | |
| <ul style="list-style-type: none"> • Application of bandages | | | |
| <ul style="list-style-type: none"> • Internal and External fixation care | | | |
| <ul style="list-style-type: none"> • Pin Care/external fixtures | | | |
| <ul style="list-style-type: none"> • Care of patient with "POP" | | | |
| <ul style="list-style-type: none"> • Application of bandages | | | |
| <p>17. Pre-operative Management The Nurse Intern can discuss the policy and demonstrate the following:</p> | | | |
| <ul style="list-style-type: none"> • Pre-operative skin preparation | | | |
| <ul style="list-style-type: none"> • Patient teaching | | | |
| <ul style="list-style-type: none"> • Specific preparation | | | |
| <ul style="list-style-type: none"> • Organizing a pre-chest x-ray, ECG, & blood work (Pt's file) | | | |
| <ul style="list-style-type: none"> • Pre-operative checklist | | | |
| <ul style="list-style-type: none"> • Transfer patients too OR and from the recovery room | | | |

Clinical competency for Primary Health Care

| | |
|---|---|
| Key: Write the date, intern's signature, preceptor signature & rotation . 1-Procedure done for the 1 st time (Beginner) 2-Procedure done for the 2 nd time (Advanced Beginner) 3-Procedure done for the 3 rd time (Competent) | Intern Name: Unit: Batch#: Group#: |
|---|---|

| CLINICAL SKILL/TASK | 1 | 2 | 3 |
|--|---|---|---|
| 1. Familiarize with the physical set up of the unit specifically the rooms of the following with their checklists: | | | |
| a. Staff locker | | | |
| b. Male/Female changing rooms | | | |
| d. Stock room | | | |
| 2. Read and understand policies & procedures including job description. | | | |
| 3. Familiarize with international patient safety goals (IPSG). | | | |
| 4. Knows the location of the fire evacuation plan, fire extinguishers and fire alarm and to respond thru RACE and PASS | | | |
| 5. Familiarizes unit disaster plan with its roles and responsibilities | | | |
| 6. Familiarize with unit KPI: Patient Fall Prevention and Nurse turn over. | | | |
| 7. Daily checking for the instrument and equipment such as crash cart IVAC (portable IV pump), glucometer, TCOM (transcutaneous oximetry) machine...etc. are available and in good condition with updated PPM (planned preventive maintenance). | | | |
| 8. Knows how to locate the attendance sheet, duty ROTA, telephone directory | | | |
| 9. Admission, Transfer and discharge: The Nurse Intern is able to demonstrate the following : | | | |
| • The routine admission transfer and discharge of a patient | | | |
| • The care of a patients valuable | | | |
| 10. Diagnostic Investigation & Procedures The Nurse Intern is able to assist with safe preparation, and post procedural care of the patient for following procedures (Under observation) | | | |
| • Ante Natal Care | | | |
| - History taking | | | |
| - Measuring vital signs | | | |
| - Measuring & recording weight, height | | | |
| - Testing blood sugar using Glucometer | | | |
| - Test urine | | | |
| - Perform physical health assessment | | | |
| - Perform Obstetric examination (under supervision) | | | |
| - Abdominal maneuver | | | |
| - Measure & record fetal heart rate using pinard & Doppler | | | |
| - Observe & recognize P.V.loss | | | |
| - Health education | | | |

| | | | |
|---|--|--|--|
| - Documentation Nursing note | | | |
| • Post Natal Routine Care | | | |
| - History taking | | | |
| - Monitoring vital signs | | | |
| - Perform physical health assessment | | | |
| - Perform Obstetric examination (under supervision) | | | |
| - Checking level of fundus & lochia | | | |
| - Monitoring pain level | | | |
| - Providing breast care | | | |
| - Health education | | | |
| - Documentation Nursing note | | | |
| • Family Planning | | | |
| - History taking | | | |
| - Health education | | | |
| - Give complete attention to the client | | | |
| - Use simple understandable language | | | |
| - Encourage the client to ask questions | | | |
| - Answer question clearly | | | |
| - Provide complete accurate information about all options | | | |
| - Help the client to take decision | | | |
| - Explain the procedure | | | |
| - Use appropriate instructional media in explaining | | | |
| - Explain the warning signs that require immediate return | | | |
| - Discuss when the patient needs to return for follow up | | | |
| - Documentation Nursing note | | | |
| • New born care | | | |
| - Assessment of new born and identification high risk babies. | | | |
| - Gestational assessment. | | | |
| - Check vital signs | | | |
| - Assess growth: weight , height | | | |
| - Cord care | | | |
| - Health education | | | |
| - Documentation Nursing note | | | |
| • Well Child Clinic | | | |
| - History taking | | | |
| - Perform physical health assessment | | | |
| - Assess development | | | |
| - Intellectual | | | |
| - Motor | | | |
| - Social | | | |
| - Communication | | | |
| - Health education | | | |
| - Documentation Nursing note | | | |
| • Integrated management of childhood illness: Assess danger signs include: | | | |
| - Cough or difficult breathing | | | |
| - Diarrhea | | | |
| - Fever | | | |
| - Ear problem | | | |

| | | | |
|--|--|--|--|
| - Malnutrition | | | |
| - Immunization status | | | |
| • Medical and Surgical clinics | | | |
| - History taking | | | |
| - Perform physical health assessment | | | |
| - Measuring & recording weight, height | | | |
| - Testing blood sugar using Glucometer | | | |
| - Test urine | | | |
| - X-ray procedure | | | |
| - Health education | | | |
| - Documentation Nursing note | | | |
| • Surgical Dressing | | | |
| - The nurse intern is able to discuss the policy and can demonstrate the following techniques: | | | |
| - Set up surgical field | | | |
| - Wound care: assessment, implementation, equipment, nursing care, documentation. | | | |
| - Types of dressing | | | |
| - Evaluating of wound | | | |
| - Changing dressing aseptically | | | |
| - Selecting of appropriate dressing materials | | | |
| - Removal of sutures | | | |
| - Removal of staples | | | |
| • Health education: | | | |
| - Give complete attention to the client | | | |
| - Use simple understandable language | | | |
| - Encourage the client to ask questions | | | |
| - Answer question clearly | | | |
| - Provide complete accurate information about all options | | | |
| - Make summary, asking questions and encourage audience participation | | | |
| - Help the client to take decision | | | |
| - Explain the procedure | | | |
| - Use appropriate instructional media in explaining | | | |
| - Explain the warning signs that require immediate return | | | |
| - Discuss when the patient needs to return for follow up | | | |

Evaluation Form for Elective (1) Rotation

| Performance Items | | P | G | VG | E |
|---|--|---|---|----|---|
| I. Application of scientific knowledge and principle | | 1 | 2 | 3 | 4 |
| 1. Demonstrates knowledge of nursing process in delivering patient care by: | | | | | |
| a. Assessing patient needs. | | | | | |
| b. Setting goals to meet the needs. | | | | | |
| c. Planning patient care based on priorities. | | | | | |
| d. Implementing the developed plan. | | | | | |
| e. Evaluating outcomes and reassessing the patient. | | | | | |
| 2. Integrating knowledge of physiological, psychological and sociological into patient care. | | | | | |
| II. Quality of work | | 1 | 2 | 3 | 4 |
| 1. Work within standards of nursing care practices, policies and procedures and established protocols for the unit. | | | | | |
| 2. Performs independent nursing action according to patient needs. | | | | | |
| 3. Priorities the patient care in consideration with the overall assignments in the units. | | | | | |
| 4. Demonstrates confidence and safety in the performance of nursing procedures. | | | | | |
| II. Communication skills | | 1 | 2 | 3 | 4 |
| 1. Maintains good interpersonal relationship with the co-workers. | | | | | |
| 2. Accepts constructive feedback from preceptor and other staff. | | | | | |
| 3. Request assistance of preceptor or designee when faced with managerial or clinical problem. | | | | | |
| 4. Responds appropriately to patients and families questions, concerns, and request. | | | | | |
| III. Documentation | | 1 | 2 | 3 | 4 |

| | | | | | |
|---|--|---|---|---|-----|
| Demonstrates competence in documenting patient care, and maintain a Complete, accurate and concise. | | | | | |
| IV. Professionalism | | 1 | 2 | 3 | 4 |
| 1. Adheres to professional and ethical standards when dealing with patients and health care team members. | | | | | |
| 2. Punctuality: Reports to work on time, maintains good attendance record and completes given assignment on time. | | | | | |
| 3. Adheres to dress code and maintain professional appearance. | | | | | |
| 4. Demonstrate positive attitude toward nursing care. | | | | | |
| 5. Shows initiative to learn and seek new learning opportunities. | | | | | |
| V. Health Education | | 1 | 2 | 3 | 4 |
| 1. Promotes positive environment for health teaching. | | | | | |
| 2 Provides effective education based on needs. | | | | | |
| 3. Evaluate the effectiveness of teaching. | | | | | |
| VI. Case presentation | | 2 | 4 | 6 | 8 |
| 1. Performs case presentation within the framework of nursing process. | | | | | |

The presentation will be done using PowerPoint and must observe the following:

1. A clear and concise introduction to the topic.
2. Aims and outcomes of the presentation.
3. Clear, readable English writing and grammar.
4. Conclusions and recommendations.
5. Current evidence from research (references and proper citation).
6. Presentation time is 15 minutes minimum and 20 minutes maximum

Case Presentation or Project Evaluation

Topic: -----

Method of Presentation: -----

(Indicate: lecture, demonstration, case presentation, bedside conference, reading journal, film showing, etc.)

Note: Each specialty should have its own presentation; the topic should be submitted in the **first week** of the specialty rotation and presented in the **last week** of orientation, a written proposal or a copy should be submitted one week prior to the presentation to the concerned area manager.

CLINICAL COMPETENCY FOR CRITICAL CARE UNITS

Key” Write the date, intern’s signature, preceptor signature & rotation (compulsory units)
 1-Procedure done for the 1st time (Beginner)
 2-Procedure done for the 2nd time (Advanced Beginner)
 3-Procedure done for the 3rd time (Competent)

Intern Name:

Unit: Batch#: Group#:

| CLINICAL SKILL/TASK | 1 | 2 | 3 |
|---|---|---|---|
| 1. Critical Lines The Nurse Intern is able to demonstrate the following: | | | |
| • Collection of equipment for insertion of Central Line | | | |
| • Discuss the normal parameters of CVP | | | |
| • Determines and records CVP using a water manometer and cardiac monitor | | | |
| • Identifies chest landmarks for CVP measurement | | | |
| • The administration of drugs and fluids | | | |
| • The “flushing” of a Central Line | | | |
| • Aseptically change Central IV Lines | | | |
| • Setting up a transducer system | | | |
| • Aseptically changing a Central IV site dressing | | | |
| • The safe removal of Central Lines | | | |
| • Use of Porta-caths & Hickman catheter | | | |
| • Risks & complications of Central Lines | | | |
| • Interventions/troubleshoot complications of Central Lines | | | |
| 2. Pulmonary Artery Catheters & Arterial Lines in Critical Care Nursing The Nurse Intern is able to discuss and constantly demonstrate the following: | | | |
| • Take appropriate action to prevent or resolve complications of PA Catheters & Arterial Lines | | | |
| • Setting up a single and multiple transducer system | | | |
| • Identify a PA and Arterial trace on the cardiac monitor | | | |
| • Zeroing of a PA & Arterial Lines | | | |
| • The purpose for performance of an Allen’s test | | | |
| • Correct technique for drawing blood from an PA Catheter & Arterial Line | | | |
| • Supervised performance of a PAWP | | | |

CLINICAL COMPETENCY OPERATING ROOM

Key: Write the date, intern's signature, preceptor signature & rotation (compulsory units)

- 1-Procedure done for the 1st time (Beginner)
- 2-Procedure done for the 2nd time (Advanced Beginner)
- 3-Procedure done for the 3rd time (Competent)

Unit:

Batch#:

Group#:

| CLINICAL SKILL/TASK | 1 | 2 | 3 |
|---|---|---|---|
| 1. Familiarize with the physical set up of the unit specifically the rooms of the following with their checklists: | | | |
| a. Staff locker | | | |
| b. Male/Female changing rooms | | | |
| d. Stock room | | | |
| 2. Read and understand policies & procedures including job description. | | | |
| 3. Familiarize with international patient safety goals (IPSG). | | | |
| 4. Knows the location of the fire evacuation plan, fire extinguishers and fire alarm and to respond thru RACE and PASS | | | |
| 5. Familiarize with unit disaster plan with its roles and responsibilities | | | |
| 6. Familiarize with unit KPI: Patient Fall Prevention and Nurse turn over. | | | |
| 7. Daily checking for the instrument and equipment such as, crash cart IVAC (portable IV pump), glucometer, TCOM (transcutaneous oximetry) machine, skin thermometer...etc. are available and in good condition with updated PPM (planned preventive maintenance). | | | |
| 8. Knows how to locate the attendance sheet, duty ROTA, telephone directory | | | |
| 9. Admission, Transfer and discharge: The Nurse Intern is able to demonstrate the following: | | | |
| • The routine admission transfer and discharge of a patient | | | |
| • The care of a patients valuable | | | |
| 10. knowledge of specialized equipment in OR | | | |
| • OR Tables (General/ Specialized) | | | |
| • Electrocutive Devices (Diathermy) | | | |
| • Hypo/Hyperthermia Devices | | | |
| 11. knowledge of Aseptic Technique, Application of Universal Precautions in OR | | | |
| 12. knowledge of Sterilization Techniques in OR | | | |
| 13. Knowledge of Care of Instruments/Equipment. | | | |
| 14. General Introduction to these Surgical specialty | | | |
| • General / Abdominal | | | |
| • Orthopedics | | | |
| • Urology | | | |

| | | | |
|--|--|--|--|
| • Gynecology | | | |
| • Obstetrics | | | |

| • Thoracic | | | |
| • Vascular | | | |
| • Neurosurgery | | | |
| • Plastic / Reconstructive | | | |
| • Pediatric | | | |
| 15. Attended and Participated in these Procedure General / Abdominal Surgery Procedures: | | | |
| • Abdominal- Perineal Resection | | | |
| • Adrenalectomy | | | |
| • Anal Fissurectomy | | | |
| • Appendectomy | | | |
| • Basal Cell Carcinoma Excision | | | |
| • Bone marrow Harvest | | | |
| • Breast Biopsy | | | |
| • Bowel Resection | | | |
| • Cholecystectomy, Cholangiogram | | | |
| • Choledocoscopy | | | |
| • Colectomy | | | |
| • Colostomy Ileostomy, Closure of | | | |
| • Decubitus-Debridement, Closurfe of | | | |
| • Diverticulectomy | | | |
| • Drainage of Abdominal Abscess | | | |
| • Exploratory Laparotomy | | | |
| • Gastrectomy | | | |
| • Gastrostomy Feeding Tube | | | |
| • Hemorrhoidectomy | | | |
| • Herniorrhaphy | | | |
| • Lipoma, Excision of | | | |
| • Laparoscopy-General | | | |
| • Lymph Node Dissection | | | |
| • Mastectomy | | | |
| • Pancreatectomy | | | |
| • Pilonidal Cystectomy | | | |
| • Splenectomy | | | |
| • Vagotomy-Pyloroplasty | | | |
| • Whipple Procedure | | | |
| Plastic/ Reconstructive Surgery Procedures: | | | |
| • Blepharoplasty | | | |
| • Burn Surgery | | | |
| • Derabrasion | | | |
| • Laceration Repair | | | |
| • Mammoplasty- Augmentation, Reduction | | | |
| • Pedicle Grafts | | | |
| • Scare Revision | | | |
| • Skin Grafting- Split Thickness | | | |
| Ophthalmology/ ENT/Dental Procedures: | | | |
| • Cataract Extraction with Lens Implant | | | |

| | | | |

CLINICAL COMPETENCY FOR HEMODIALYSIS

Key: Write the date, intern's signature, preceptor signature & rotation (compulsory units)
 1-Procedure done for the 1st time (Beginner)
 2-Procedure done for the 2nd time (Advanced Beginner)
 3-Procedure done for the 3rd time (Competent)

Intern Name:

Unit: Batch#: Group#:

| CLINICAL SKILLS/TASK | 1 | 2 | 3 |
|---|---|---|---|
| 1. Familiarize with the physical set up of the unit specifically the rooms of the following with their checklists: | | | |
| a. Staff locker | | | |
| b. Male/Female changing rooms | | | |
| c. Stock room | | | |
| 2. Read and understand policies & procedures including job description. | | | |
| 3. Familiarize with international safety goals (IPSG) | | | |
| 4. Knows the location of the fire evacuation plan, fire extinguishers and fire alarm and to respond thru RACE and PASS | | | |
| 5. Familiarize with unit disaster plan with its roles and responsibilities | | | |
| 6. Familiarize with unit KPI: Patient Fall Prevention and Nurse turn over. | | | |
| 7. Daily checking for the instrument and equipment such as otoscope, ophthalmoscope, crash cart IVAC (portable IV pump), glucometer, TCOM (transcutaneous oximetry) machine ...etc. are available and in good condition with updated PPM (planned preventive maintenance). | | | |
| 8. Knows how to locate the attendance sheet, duty ROTA, telephone directory | | | |
| 9. Admission ,Transfer and discharge: The Nurse Intern is able to demonstrate the following: | | | |
| • The routine admission transfer and discharge of a patient | | | |
| • The care of a patients valuable | | | |
| 10. Examining Vascular Access Integrity The Nurse Intern is able to demonstrate the following: | | | |
| • Observes previous needle sites and stage of healing | | | |
| • Observes for dryness | | | |
| • Observes for bruises | | | |
| • Checks for bleeding below the surface of the skin | | | |
| • Checks for ballooning of a weak spot in vessel wall | | | |
| • Checks for presence of any enlargement or expansion of blood vessel | | | |
| • Assess for ischemia of the hand and fingers | | | |
| • Feels for presence of pulse | | | |
| • Listens with stethoscope for bruit | | | |
| • Uses the Doppler ultrasound machine to assess for bruit in case of its absence with the stethoscope | | | |
| • Checks that vascular access is free from infection by absence of: *Redness | | | |

| | | | |
|--|--|--|--|
| *Tenderness *Swelling *Warmth *Serous Drainage *Pus Drainage | | | |
| 11. Preparing Vascular Access (AV Fistula, AV Graft) The Nurse Intern is able to demonstrate the following: | | | |
| <ul style="list-style-type: none"> • Prepares venipuncture access sites: <ul style="list-style-type: none"> - Asks the patient to wash his fistula arm with liquid soap and dry with paper towel - Prepares the needle insertion sites with betadine for a full 10 minutes using a circular motion or a downward motion - Allows area to dry | | | |
| <ul style="list-style-type: none"> • Selects puncture sites: <ul style="list-style-type: none"> - Palpate over the entire length of the fistula - Occludes vessel with finger – feel for pulse - Avoids the access surgery Scars, Aneurysms, scar tissue, hematomas, inflamed or infected areas, or skin lesions of any kind | | | |
| <ul style="list-style-type: none"> - Keeps a distance of 3-5 cm between arterial and venous needle sites | | | |
| <ul style="list-style-type: none"> - Inserts arterial needle first, at least 3 cm away from the site of the arteriovenous (AV) anastomosis | | | |
| <ul style="list-style-type: none"> - Ensures the arterial needle clamp is closed, inserts the needle with bevel up, at a 45-degree angle and against the blood stream | | | |
| <ul style="list-style-type: none"> • Insert venous needle <ul style="list-style-type: none"> - Occludes vessel with finger-feels for pulse - Keeps a distance of 3-5 cm between arterial and venous needle sites - Inserts venous needle at least 3 cm away from the site of the arteriovenous (AV) anastomosis - Ensures the venous needle clamp is closed, inserts the needle with bevel up, at a 45-degree angle and in the direction of blood stream - Connects arterial needle to the arterial line and venous needle to the venous line - Applies dry dressing, secures tubes with tape | | | |
| 12. Preparing Vascular Access (Percutaneous Venous Access) | | | |
| <ul style="list-style-type: none"> • Prepares vascular access site <ul style="list-style-type: none"> - Removes the dressing using alcohol swab at the edges - Prepares the access insertion site and the arterial and venous lines with betadine for a full 10 minutes using a circular motion or a downward motion - Allows area to dry | | | |
| <ul style="list-style-type: none"> • Recaps the arterial and venous catheters, ensures that the catheters are clamped | | | |
| <ul style="list-style-type: none"> • Connects the arterial catheter to the 10 cc-syringe aspirates and assesses backflow of blood, pushes the normal saline and detects resistance | | | |
| <ul style="list-style-type: none"> • Connects the venous catheter to the 10 cc-syringe aspirates and | | | |

| | | | |
|--|--|--|--|
| assesses backflow of blood, pushes the normal saline and detects resistance | | | |
| <ul style="list-style-type: none"> Connects the arterial catheter to the arterial line and the venous catheter to the venous line | | | |
| <ul style="list-style-type: none"> Unclamps the catheters | | | |
| <ul style="list-style-type: none"> Applies dressing, secures tubes with tape | | | |
| <ul style="list-style-type: none"> Initiating Hemodialysis: Sets the dialysis machine to perform the following functional safety alarms checks pre-dialysis: <ul style="list-style-type: none"> Arterial pressure high/low alarms Venous pressure high/low alarms Air detector Conductivity high/low alarms Dialysate temperature high/low alarms Dialysate flow alarms | | | |
| <ul style="list-style-type: none"> Uses dialysis concentrate and dialyzer as prescribed. | | | |
| <ul style="list-style-type: none"> Primes dialyzer and tubing with normal saline | | | |
| <ul style="list-style-type: none"> Checks all tubing connections | | | |
| <ul style="list-style-type: none"> Inter dialysis machine monitoring: dialysis machine functional alarms are checked for safe operation | | | |
| <ul style="list-style-type: none"> Vital signs and pre dialysis assessments have been completed and recorded | | | |
| <ul style="list-style-type: none"> Needles have been properly inserted and taped into position securely. | | | |
| <ul style="list-style-type: none"> Heparin bolus order is infused before initiating dialysis through the venous needle | | | |
| <ul style="list-style-type: none"> Connects the arterial line to the arterial needle and venous line to the venous needle | | | |

|---|--|--|--|
| <ul style="list-style-type: none"> - Blurred vision - Drop in patient’s normal pressure - Loss of consciousness | | | |
| <ul style="list-style-type: none"> • Observes patient for signs and symptoms of: <ul style="list-style-type: none"> - Itching - Flushing - Shortness of breath - Pain and discomfort - Apprehension or nervousness - Irritability - Sleepiness - Restlessness or confusion - Fever and chills | | | |
| <ul style="list-style-type: none"> • Machine monitoring inter dialysis: <ul style="list-style-type: none"> - Checks equipment safety - Inspect the dialyzer and bloodlines for air - Watches the blood leaks - Checks for clotting - Checks pressure alarms - Checks monitor blood and dialysate flow rates - Checks dialysate temperature, conductivity, and PH - Checks the correct rate of heparin infusion every 30 min - Checks tubing connections | | | |
| <ul style="list-style-type: none"> • Inspects venipuncture site and taping | | | |
| <ul style="list-style-type: none"> • Checks blood flow rate | | | |
| <ul style="list-style-type: none"> • Post –dialysis Patient Care: | | | |
| <ul style="list-style-type: none"> • Discontinues dialysis: <ul style="list-style-type: none"> - Checks pressure and pulse just before discontinuing dialysis (usually 5 min before termination) - Turns off heparin pump several minutes to an hour before the end of treatment - Reduces blood flow rate and negative pressure - Rinses the dialyzer and blood lines with normal saline - Clamps arterial and venous lines | | | |
| <ul style="list-style-type: none"> • Remove the needles: <ul style="list-style-type: none"> - Un-tapes and removes the venous needle - Applies gentle pressure to the puncture site - Un-tapes and remove the arterial needles - Applies moderate direct pressure to the puncture site be hand until the bleeding stops - Cleans and dresses the access following sterile technique, dressing is applied securely | | | |
| <ul style="list-style-type: none"> • Perform post dialysis assessment: <ul style="list-style-type: none"> - Checks post weight - Checks blood pressure (sitting, lying, and standing) - Measure temperature - Measure pulse rate - Checks access for bruit and patency - Listens to compliance and observes behavior of the patient post dialysis | | | |
| <ul style="list-style-type: none"> • Documents information about patient’s medical care in the | | | |

| | | | |
|---|--|--|--|
| <p>medical record including:</p> <ul style="list-style-type: none"> - Medications include saline administration during dialysis - Amount of saline needed to return the patient’s blood at the end of dialysis - Evaluation of the patient’s access (infection, patency, bruit/thrill) - Amount of heparin given during the treatment - Estimate any blood loss that occurred (rupture or clotted dialyzer, Prolonged bleeding after treatment, clots, or fibrin rings in drip chambers) - Complications occurring in the dialysis machine or patient - Vital signs - Update medication order in the patient chart - Any special instructions given to the patient - Ensures the patient’s general condition is satisfactory before discharge from the dialysis unit | | | |
| <ul style="list-style-type: none"> • Post-dialysis Machine Care: | | | |
| <ul style="list-style-type: none"> • Applies blood and body fluid precautions when handling hemodialysis machine components | | | |
| <ul style="list-style-type: none"> • Removes dialyzer and bloodlines from the dialysis machine and discards them in the blood and body fluids container (red containers) | | | |
| <ul style="list-style-type: none"> • Discards needles in the sharp container | | | |
| <ul style="list-style-type: none"> • Removes clamps and other non-disposable items and disinfect according to unit procedure before using for another patient | | | |
| <ul style="list-style-type: none"> • Cleans the outer surface of the machine with a disinfectant solution after each treatment | | | |
| <ul style="list-style-type: none"> • Disinfects the dialysis machine between patient’s by heat and chemicals used in the unit | | | |

CLINICAL COMPETENCY FOR CATHETERIZATION LABORATORY

Key” Write the date, intern’s signature, preceptor signature & rotation (compulsory units)
 1-Procedure done for the 1st time (Beginner)
 2-Procedure done for the 2nd time (Advanced Beginner)
 3-Procedure done for the 3rd time (Competent)

Intern Name:

Unit: Batch#: Group#:

| CLINICAL SKILL / TASK | 1 | 2 | 3 |
|--|---|---|---|
| 1. Familiarize with the physical set up of the unit specifically the rooms of the following with their checklists: | | | |
| a. Staff locker | | | |
| b. Male/Female changing rooms | | | |
| d. Stock room | | | |
| 2. Read and understand policies & procedures including job description. | | | |
| 3. Familiarize with international patient safety goals (IPSG) | | | |
| 4. Knows the location of the fire evacuation plan, fire extinguishers and fire alarm and to respond thru RACE and PASS | | | |
| 5. Familiarize with unit disaster plan with its roles and responsibilities | | | |
| 6. Familiarize with unit KPI: Patient Fall Prevention and Nurse turn over. | | | |
| 7. Checking the crash cart | | | |
| 8. Daily checking for the instrument and equipment such as IVAC (portable IV pump), glucometer, TCOM (transcutaneous oximetry) machine, Doppler, skin thermometer...etc. are available and in good condition with updated PPM (planned preventive maintenance | | | |
| 9. Knows how to locate the attendance sheet, duty ROTA, telephone directory | | | |
| 10. Physicians & other health professionals on call roster board schedule of beeper listening | | | |
| 11. Admission, Transfer and discharge: The Nurse Intern is able to demonstrate the following : | | | |
| • The routine admission transfer and discharge of a patient | | | |
| • The care of a patients valuable/ belongings | | | |
| General Nursing Skills The Nurse Intern is able to complete the following activities: | | | |
| 12. Measuring & recording of: | | | |
| • Vital signs: | | | |
| - Temperature | | | |
| - Pulse Rate | | | |
| - Respiratory Rate | | | |
| - Blood Pressure | | | |
| • Pulse Oximetry Set-up & Reading | | | |
| • Height & Weight | | | |
| 13. Cardiac Bedside, Transport monitor and Central Desk EKG Monitoring: | | | |
| a. Aware of the location of Monitor Manual. | | | |
| b. Prepares skin and appropriately attaches electrodes and EKG cable leads. | | | |
| c. Sets rate alarm limits appropriately. | | | |
| d. Changes Lead selection for appropriate wave form. | | | |
| e. Changes size of ECG waveform. | | | |
| f. Correctly clears history of alarms on central monitor | | | |
| g. Troubleshoots alarms/error codes appropriately. | | | |
| h. Documentation of Pt. vital signs, oxygen saturation by using cardiac | | | |

| | | | |
|--|--|--|--|
| monitor. | | | |
| 14. Medication Administration The Nurse Intern is observed to consistently demonstrate high level of care & maintenance to the policy related to the administration of medications by the following routes | | | |
| - Subcutaneous injections | | | |
| - Intradermal injections | | | |
| - Intramuscular injections | | | |
| - Intravenous injections | | | |
| - IV Push/ Bolus | | | |
| - Inhalers | | | |
| - Nebulizer | | | |
| • Follow hospital policy for Documentation of drug administration | | | |
| • Consult appropriate sources for the necessary information regarding unfamiliar medications e.g. Direct vasodilator, Beta agents | | | |
| The Nurse intern is able to describe the following: | | | |
| • The supply of drugs to the wards/unit | | | |
| • The safe keeping of ward stock drugs in the drug cupboard and refrigerator | | | |
| • The correct checking & administration of all medication administration | | | |
| • The appropriate documentation related to medication administration | | | |
| • The supply of medication to patients being discharged | | | |
| • Documentation related to Drug errors | | | |
| 15. Controlled & Narcotic Drugs The Nurse Intern is able to discuss & competently demonstrate the following activities | | | |
| • The procedure for incidents of Narcotic & Control Drug breakages or errors | | | |
| • The administration of a controlled or narcotic medication to a patient | | | |
| • The correct procedure in dispensing a controlled or narcotic drug using the narcotic drug register | | | |
| 16. IV Therapy (Cannulation/Lines/Burettes) The Nurse Intern is able to demonstrate the appropriate techniques of the following | | | |
| • Insertion of an IV Cannula, maintaining an IV cannula/Heplock | | | |
| • Measuring & documenting input and output readings | | | |
| • Regulating IV | | | |
| • Changing an IV site dressing | | | |
| Demonstrate ability to use IV devices: | | | |
| • Set up and regulation of IV infusion pumps | | | |
| - The calculation of proper concentration and rate of infusion | | | |
| - The dilution strength of fluids and the time required for infusions | | | |
| 17. Able to response to code and function as a cardiac arrest team | | | |
| 18. Patient Hygiene | | | |
| 19. Infection Control The Nurse Intern will be able to: | | | |
| • Demonstrate appropriate hand washing technique (as Indicated by WHO "Five Moment") | | | |
| • Apply principles of aseptic techniques in performing | | | |
| - Dressing change | | | |
| - IV cannulation | | | |
| • The Nurse Intern will be able to discuss: | | | |
| - Universal/standard precautions | | | |
| - The Post Mortem Policy | | | |
| • Disposes waste/Materials appropriately | | | |
| 20. Invasive hemodynamic monitoring set up: The Nurse Intern is able to demonstrate the appropriate techniques of the following: | | | |
| • A-line/CVP: demonstrate set up of an arterial pressure and connect the system to | | | |

| | | | |
|---|--|--|--|
| a patient. | | | |
| <ul style="list-style-type: none"> • Demonstrate proper techniques for obtaining blood sample from an arterial catheter | | | |
| <ul style="list-style-type: none"> • Recognize variability of pressure reading obtained with catheter (aortic,femoral,axillary) | | | |
| <ul style="list-style-type: none"> • Recognize variability of pressure reading obtained with peripheral catheter (radial,ulner,brachial,dorsal,dorsal pedis,posthiobital sets) | | | |
| <ul style="list-style-type: none"> • Demonstrate techniques used to remove arterial catheter | | | |
| <ul style="list-style-type: none"> • Pulmonary artery pressure monitor | | | |
| 21. Scrub Nurse Role and Responsibilities: The Nurse Intern is able to demonstrate the appropriate techniques of the following | | | |
| 1. Assists the operator/cardiologist with diagnostic and interventional procedures. | | | |
| <ul style="list-style-type: none"> ▪ Demonstrates knowledge in different Cath Lab procedures: | | | |
| <ul style="list-style-type: none"> - Cardiac Catheterization | | | |
| <ul style="list-style-type: none"> - Temporary Pacemaker Insertion | | | |
| <ul style="list-style-type: none"> - Intra-aortic Balloon Pump Insertion | | | |
| <ul style="list-style-type: none"> - Right Heart Catheterization | | | |
| 2. Addresses the team for surgical time-out prior to the procedure. | | | |
| 3. Recognizes the importance of maintaining sterility peri-operative: | | | |
| <ul style="list-style-type: none"> ▪ Performs surgical handwashing prior to the procedure. | | | |
| <ul style="list-style-type: none"> ▪ Wears the gown and gloves aseptically. | | | |
| <ul style="list-style-type: none"> ▪ Prepares the operative site by cleaning with appropriate skin preparations (povidone iodine, chlorhexidine) | | | |
| <ul style="list-style-type: none"> ▪ Drapes the patient aseptically. | | | |
| <ul style="list-style-type: none"> ▪ Assorts and brings used instruments in the washing area cleaned and separated accordingly. | | | |
| 4. Observes proper techniques in handling catheters, sheaths, guidewires, balloons, stents and other devices: | | | |
| <ul style="list-style-type: none"> ▪ Flushes the catheters, sheaths, guidewires and other devices. | | | |
| <ul style="list-style-type: none"> ▪ Prepares the balloons and stents and performs inflation at proper pressure and time. | | | |
| <ul style="list-style-type: none"> ▪ Handles the supplies properly to avoid accidental splashes of blood and water to the team | | | |
| <ul style="list-style-type: none"> ▪ Assists in application of closure device after sheath removal. | | | |
| <ul style="list-style-type: none"> ▪ Performs radial sheath removal and applies Transradial band properly. | | | |
| <ul style="list-style-type: none"> ▪ Performs femoral artery compression after sheath removal and properly applies pressure dressing | | | |
| 5. Notifies the circulating nurse of any needs during the procedure: | | | |
| <ul style="list-style-type: none"> ▪ Check the completeness of the preparation and all the items are sterile. | | | |
| <ul style="list-style-type: none"> ▪ Keep special instruments and supplies ready and informs the circulating nurse of any lacking materials. | | | |
| 22. Circulating Nurse Role and Responsibilities: The Nurse Intern is able to demonstrate the appropriate techniques of the following | | | |
| 1. Assesses the patient upon receiving the patient and prior to the procedure: | | | |
| <ul style="list-style-type: none"> ▪ Identifies the patient correctly using two identifiers (Name, Medical Record Number) | | | |
| <ul style="list-style-type: none"> ▪ Asks the patient for any allergies and informs the physician of it. | | | |
| <ul style="list-style-type: none"> ▪ Checks the patient's vital signs prior to the procedure. | | | |

| | | | |
|--|--|--|--|
| <ul style="list-style-type: none"> Assesses the cardiovascular, pulmonary, neurological, renal and vascular status of the patient. | | | |
| <ul style="list-style-type: none"> Checks the patient's laboratory results | | | |
| <ul style="list-style-type: none"> Informs the physician immediately if there are any problems or critical information in regard to the patient | | | |
| 2. Administers proper preparation and interventions pre-operative: | | | |
| <ul style="list-style-type: none"> Prepares the procedure room appropriately for the procedure. | | | |
| <ul style="list-style-type: none"> Tests the operation of light, suction machine, cardiac monitors, defibrillator, piped-in oxygen and tank. | | | |
| <ul style="list-style-type: none"> Ensure availability of intubation gadgets, pacemaker devices, supplies, and other equipment to be used. | | | |
| <ul style="list-style-type: none"> Prepares the procedure table and provides appropriate supplies thus minimizing wastage. | | | |
| <ul style="list-style-type: none"> Promotes physical comfort and safety when transporting, lifting and positioning patient. | | | |
| <ul style="list-style-type: none"> Positions the patient appropriately on the table while observing fall risk precautions and optimal skin protection for skin integrity. | | | |
| <ul style="list-style-type: none"> Attaches patient to the cardiac monitor: | | | |
| <ul style="list-style-type: none"> Demonstrates management of pain during and immediately after Cath Lab procedure. | | | |
| <ul style="list-style-type: none"> Demonstrates knowledge and competency in use of medications including emergency drugs, sedatives and reversal agents. | | | |
| <ul style="list-style-type: none"> Applies proper assessment and interventions if the patient is sedated in accordance to the sedation course manual. | | | |
| <ul style="list-style-type: none"> Operate the defibrillator when needed in emergency situations, prepare external pacemaker device as needed. | | | |
| <ul style="list-style-type: none"> Prepares the materials for sheath removal and assists scrub nurse in sheath removal. Applies pressure dressing if needed. | | | |
| <ul style="list-style-type: none"> Transfer the patient to the recovery room after properly fixing the patient's gown and assuring patient is stable for transfer. | | | |
| 3. Reviews the patient's status during the case: | | | |
| <ul style="list-style-type: none"> Performs surgical time-out prior to and after every procedure. | | | |
| <ul style="list-style-type: none"> Gives relevant information about the patient's status and call other nurse's attention to any special endorsement or medications. | | | |
| <ul style="list-style-type: none"> Observes the importance of maintaining sterility of the field and the unit. | | | |
| <ul style="list-style-type: none"> Prepares the operative site properly with the use of povidone iodine and chlorhexidine. | | | |
| <ul style="list-style-type: none"> Re-shave skin hair if needed and remove sticky adhesive or extra clothing if present. | | | |
| 4. Notifies the physician of any status changes from the patient and administer appropriate care: | | | |
| <ul style="list-style-type: none"> Identifies risks (Air embolism, catheter rupture, over volume injection, contrast reaction etc.) during procedure and applies appropriate interventions. | | | |
| <ul style="list-style-type: none"> Physically monitors patient's status during the procedure and reports and change in status, ECG and hemodynamics. | | | |
| <ul style="list-style-type: none"> Monitors intravenous fluids, vital signs, effects of sedatives and reports any untoward data, signs and symptoms. | | | |
| <ul style="list-style-type: none"> Demonstrates appropriate assessment and treatment in accordance with the ACLS during Code Blue. | | | |
| 23. Documentation Nurse Role and Responsibilities: The Nurse Intern is able to demonstrate the following: (according to the policy): | | | |
| 1. Assesses patient chart for appropriate pre-procedure data and interventions: | | | |

| | | | |
|--|--|--|--|
| <ul style="list-style-type: none"> ▪ Checks the patient’s laboratory result. | | | |
| <ul style="list-style-type: none"> ▪ Checks the medications and interventions administered to the patient prior to the procedure. | | | |
| <ul style="list-style-type: none"> ▪ Reviews the completeness of the consent and the chart during endorsement. | | | |
| <ul style="list-style-type: none"> ▪ Receives endorsement from the Unit Nurse using SBAR method. | | | |
| 2. Assesses patient’s knowledge base/needs in regard to age, education and level of consciousness: | | | |
| <ul style="list-style-type: none"> ▪ Identify cultural and religious needs, language barriers, physical and psychological limitations and education barriers | | | |
| <ul style="list-style-type: none"> ▪ Explains to the patient prior to the procedure what is expected inside the Cath Lab. | | | |
| <ul style="list-style-type: none"> ▪ Provides appropriate health teachings to the patient/family after the procedure. | | | |
| 3. Reviews the patient’s status during the surgical time-out together with the team. | | | |
| 4. Observes the importance of maintaining sterility of the field. | | | |
| 5. Notes all information and interventions done to patient and documents it on the chart. | | | |
| <ul style="list-style-type: none"> ▪ Documents patient data and outcomes, pre, intra and post-catheterization. | | | |
| <ul style="list-style-type: none"> ▪ Documents all interventions and management done on patients pre, intra and post-catheterization. | | | |
| <ul style="list-style-type: none"> ▪ Endorses the patient properly to the Unit Nurse using SBAR method. | | | |
| 24. Recovery Room Nurse Role and Responsibilities: | | | |
| The Nurse Intern can demonstrate the appropriate techniques of the following | | | |
| 1. Assesses patient’s condition post procedure: | | | |
| <ul style="list-style-type: none"> ▪ Monitors patient’s vital signs <ul style="list-style-type: none"> - Attach the patient to cardiac monitor | | | |
| <ul style="list-style-type: none"> ▪ Check for any signs and symptoms of: <ul style="list-style-type: none"> - Potential respiratory dysfunction - Alterations in cardiac output - Alterations/changes in hydration status - Alterations in core temperature - Altered LOC - Presence of pain - Presence of contrast allergic reactions | | | |
| 2. Answers patient’s questions regarding the procedure and provides information or health teachings related to the procedure: | | | |
| 3. Reports any changes in patient’s dressing site or operative site: | | | |
| <ul style="list-style-type: none"> ▪ Check for the presence of bleeding or hematoma | | | |
| <ul style="list-style-type: none"> ▪ Performs compression of the artery and reinforces the dressing or pressure pack for femoral puncture site | | | |
| <ul style="list-style-type: none"> ▪ Checks the transradial band for signs of bleeding and adjusts the inflation of the band until bleeding stops. | | | |
| 4. Observes for any changes in patient’s status and provides appropriate treatment and interventions needed. | | | |
| <ul style="list-style-type: none"> ▪ Provides appropriate pain management post procedure ▪ Applies proper Advance Cardiac Life Support during Code Blue ▪ Delivers interventions for patients with vasovagal attacks during femoral compression | | | |
| 25. Documentation & Verbal Report | | | |
| The Nurse Intern is able to demonstrate the following: (according to the policy) | | | |
| <ul style="list-style-type: none"> • Complete the Kardex accurately | | | |
| <ul style="list-style-type: none"> • Updates Nursing Care Plan | | | |
| <ul style="list-style-type: none"> • Reports/records information accurately according to hospital policy | | | |

CLINICAL COMPETENCY FOR NICU

Key: Write the date, intern's signature, preceptor signature & rotation.

1. Procedure done for the 1st time (Beginner)
2. Procedure done for the 2nd time (advanced beginner)
3. Procedure done for the 3rd time. (Competent)

Intern Name:

Unit: Batch#: Group#:

| Clinical skills /Task | 1 | 2 | 3 |
|---|---|---|---|
| 1. Familiarize with the physical set up of the unit specifically the rooms of the following with their checklists: | | | |
| a. Staff locker | | | |
| b. Male/Female changing rooms | | | |
| c. Physician's room | | | |
| d. Stock room | | | |
| e. Treatment room | | | |
| 2. Read and understand policies & procedures including job description | | | |
| 3. Familiarize with IPSG including: | | | |
| ▪ Using incubator & Phototherapy | | | |
| ▪ Using restrain – when required | | | |
| ▪ Radiant warmer | | | |
| 4. Knows the location of the fire evacuation plan, fire extinguishers and fire alarm and to respond thru RACE and PASS | | | |
| 5. Familiarizes unit disaster plan with its roles and responsibilities. | | | |
| 6. Familiarizes unit protocols of the following: Cardiac Arrest, Seizure.....etc. | | | |
| 7. Checking the crash cart | | | |
| 8. Daily checking for the instrument and equipment such as IVAC (portable IV pump), glucometer, TCOM (transcutaneous oximetry) machine, Doppler ...etc. are available and in good condition with updated PPM (planned preventive maintenance | | | |
| 9. Knows how to locate the attendance sheet, duty ROTA, vacation plan, telephone directory | | | |
| 10. Physicians & other health professionals on call roster board schedule of beeper listening | | | |
| 11. Admission, transfer procedures | | | |
| 12. Infection control | | | |
| • Applying hospital infection control policy in relation to: | | | |
| a. Principals of Asepsis | | | |
| b. Isolation principals | | | |
| c. Disposal of waste materials | | | |
| 13. Diagnostic preparation- follows protocol for various diagnostic procedures. | | | |

| | | | |
|--|--|--|--|
| 14. Daily nursing care: | | | |
| ▪ Patient hygiene | | | |
| ▪ Assess the newborn generally | | | |
| ▪ Assess gestational age | | | |
| ▪ Length and weight | | | |
| ▪ Neonate vital signs | | | |
| 15. Neurology | | | |
| a. Assessment of the neurological system: | | | |
| b. Fontanel and cranial sutures | | | |
| c. Level of consciousness | | | |
| d. Motor response | | | |
| e. Reflexes: | | | |
| ▪ Rooting | | | |
| ▪ Sucking | | | |
| ▪ Swallowing | | | |
| ▪ Moro Tonic Neck | | | |
| ▪ Grasp | | | |
| ▪ Babinski Stepping | | | |
| ▪ gaging | | | |
| ▪ Blinking | | | |
| f. posturing | | | |
| g. Pupil reactivity | | | |
| h. Head circumference | | | |
| 16. Cardiovascular: | | | |
| i. Assessment of the cardiovascular system: | | | |
| ▪ Heart sounds | | | |
| ▪ Skin color/temperature | | | |
| ▪ Pulses | | | |
| ▪ Capillary refill | | | |
| ▪ Edema | | | |
| ▪ Cardiac Bedside, Transport monitor and Central Desk EKG Monitoring | | | |
| i. Aware of the location of Monitor Manual. | | | |
| j. Prepares skin and appropriately attaches electrodes and EKG cable leads. | | | |
| k. Sets rate alarm limits appropriately. | | | |
| l. Distinguishes artifact and electrical interference from the patient's rhythm. | | | |
| m. Correctly clears history of alarms on central monitor | | | |
| n. Troubleshoots alarms/error codes appropriately. | | | |
| o. Documentation of Pt. vital signs, oxygen saturation by using cardiac monitor. | | | |
| ▪ Use of the defibrillator | | | |
| ▪ Care of the cardiac surgery patient (pre/post-op) | | | |
| ▪ Care of patient with shock | | | |
| ▪ Care of the cardiac surgery patient (pre/post-op) | | | |
| ▪ Administration of blood and blood products | | | |
| ▪ Care of a patient receiving exchange transfusion | | | |
| 17. PULMONARY | | | |

| | | | |
|--|--|--|--|
| a. Chest circumference | | | |
| b. Breath sounds | | | |
| c. Breathing pattern/effort | | | |
| d. Skin/nail bed color | | | |
| e. Respiratory secretions (color/character) | | | |
| f. RDS Score | | | |
| g. Administering and Monitoring O2 Therapy : <ul style="list-style-type: none"> ▪ Nasal cannula, hood, endotracheal tube ▪ Pulse oximetry ▪ Head box ▪ Venture mask ▪ Assisting with intubation/extubation ▪ Proper use of CPAP and ▪ Ambu-bag | | | |
| h. Care of the intubated patient Securing ETT | | | |
| i. Suctioning: duration and depth, hyperventilation | | | |
| j. Surfactant replacement therapy | | | |
| k. Performing chest physiotherapy | | | |
| l. Ventilators (use, mode, and alarm complications) | | | |
| 18. GASTROINTESTINAL/RENAL | | | |
| m. Assessment of bowel sounds | | | |
| n. Abdominal circumference/ Abdominal girth | | | |
| o. Appearance/character of urine and stool | | | |
| p. Fluid and electrolyte balance | | | |
| q. Umbilical cord care | | | |
| r. Taking and recording patient: | | | |
| ▪ TPN | | | |
| ▪ Gavage feeding | | | |
| ▪ NEC | | | |
| ▪ GI Abnormalities | | | |
| ▪ Ostomy | | | |
| ▪ Care of the patient with tube feedings: | | | |
| ▪ Checking placement and residuals on tube feedings | | | |
| ▪ Feeding intolerance | | | |
| ▪ Gastrostomy tube | | | |
| ▪ Care of infant in acute/chronic renal failure | | | |
| ▪ Care of infant on peritoneal dialysis | | | |
| ▪ Care of infant requiring bladder catheterization | | | |
| ▪ Breast feeding (pumping, collection, storage) | | | |
| 19. Collection of specimen (urine,blood,wound,CSF) | | | |
| 20. Pediatric laboratory result | | | |
| 21. Performance of physical health assessment and nursing management | | | |
| ▪ Premature neonate and Low birth infant | | | |

| | | | |
|---|--|--|--|
| ▪ Term neonate | | | |
| ▪ Congenital anomalies (cardiac, respirator, gastric, neurological, urinary tract and Hydrocephalus) | | | |
| ▪ Dawn syndrome | | | |
| ▪ Communicable disease | | | |
| ▪ Respiratory disease | | | |
| ▪ Post-natal disorder | | | |
| ▪ Jaundice | | | |
| ▪ Infant of diabetic mother | | | |
| 22. Medication administration | | | |
| The Nurse intern is observed to consistency demonstrate high level of care & maintenance to the policy related to the administration of medication by the following routes | | | |
| a. Introps, vasopressor | | | |
| b. Prostaglandin | | | |
| c. Per NGT | | | |
| d. S.C.injection | | | |
| e. Intradermal injection | | | |
| f. I.V.Injection | | | |
| g. Eye drops | | | |
| h. Ear drops | | | |
| i. Inhaler | | | |
| j. nebulizer | | | |
| • Follow hospital policy for documentation of drug administration | | | |
| • Consult appropriate sources for necessary information regarding unfamiliar drugs | | | |
| The Nurse intern is able to describe the following: | | | |
| a. The supply of drugs to the wards/unit | | | |
| b. The safe keeping of ward stock drugs in the drug cupboard and refrigerator | | | |
| c. The correct checking & administration of all medication administration | | | |
| d. The administration of specific medications | | | |
| e. The appropriate documentation related to medication administration | | | |
| f. The supply of medication to patients being discharged | | | |
| 23. Follow hospital policy for discharge procedures | | | |
| 24. Post-Mortem Care | | | |
| 25. Follow hospital policy for documentation | | | |

CLINICAL COMPETENCY FOR PICU

Key” Write the date, intern’s signature, preceptor signature & rotation

1. Procedure done for the 1st time (Beginner)
2. Procedure done for the 2nd time (advanced beginner)
3. Procedure done for the 3rd time. (Competent)

Intern Name:

Unit:

Batch#:

Group#:

| CLINICAL SKILL / TASK | 1 | 2 | 3 |
|--|---|---|---|
| 1. Familiarize with the physical set up of the unit specifically the rooms of the following with their checklists: | | | |
| a. Staff locker | | | |
| b. Male/Female changing rooms | | | |
| c. Stock room | | | |
| 2. Read and understand policies & procedures including job description. | | | |
| 3. Familiarize with international patient safety goals (IPSG) | | | |
| 4. Knows the location of the fire evacuation plan, fire extinguishers and fire alarm and to respond thru RACE and PASS | | | |
| 5. Familiarize with unit disaster plan with its roles and responsibilities | | | |
| 6. Familiarize with unit KPI: Patient Fall Prevention and Nurse turn over. | | | |
| 7. Daily checking for the instrument and equipment such as crash cart IVAC (portable IV pump), glucometer, TCOM (transcutaneous oximetry) machine, Doppler, skin thermometer... etc. are available and in good condition with updated PPM (planned preventive maintenance). | | | |
| 8. Knows how to locate the attendance sheet, duty ROTA, telephone directory | | | |
| 9. Admission, Transfer and discharge: | | | |
| The Nurse Intern is able to demonstrate the following: | | | |
| • The routine admission transfer and discharge of a patient | | | |
| • The care of a patients valuable | | | |
| The Nurse Intern is able to demonstrate the following: | | | |
| 10. General Nursing Skills | | | |
| - Measuring & recording of: | | | |
| • Vital Signs & related Observations: | | | |
| - Temperature | | | |
| - Pulse Rate | | | |
| - Respiratory Rate | | | |
| - Blood Pressure | | | |
| • Pulse Oximetry Set-up & Reading | | | |
| • Height& Weight | | | |
| 11. Cardiac related equipment | | | |
| • Aware of the location of monitor manual | | | |
| • Prepare skin and appropriately attaches electrodes and ECG | | | |
| • Sets rate alarm limits appropriately | | | |

| | | | |
|---|--|--|--|
| <ul style="list-style-type: none"> • Changes lead selection for appropriate waveform | | | |
| <ul style="list-style-type: none"> • Correctly clears history of alarms on central monitor | | | |
| 12. Respiratory care | | | |
| - Maintain Basic airway: | | | |
| a. Insert correct size airway appropriately: | | | |
| <ul style="list-style-type: none"> • Oral airway | | | |
| <ul style="list-style-type: none"> • Nasopharyngeal airway | | | |
| <ul style="list-style-type: none"> • Laryngeal mask | | | |
| b. Perform effective bag-mask breathing | | | |
| - Basic oxygen therapy | | | |
| <ul style="list-style-type: none"> • Identify indications for oxygen therapy , devices for oxygen administration: | | | |
| <ul style="list-style-type: none"> • Nasal Cannula | | | |
| <ul style="list-style-type: none"> • Simple face mask | | | |
| <ul style="list-style-type: none"> • Non-rebreathing mask | | | |
| <ul style="list-style-type: none"> • Tracheostomy mask | | | |
| - Care of chest tubes/drainage system | | | |
| - Suctioning | | | |
| <ul style="list-style-type: none"> • Oral-pharyngeal | | | |
| <ul style="list-style-type: none"> • Nasal-Pharyngeal | | | |
| 13. Medication Administration | | | |
| The Nurse Intern under observation consistently demonstrate high level of care & adhere to the policy related to the administration of medications by the following routes | | | |
| - Subcutaneous injections | | | |
| - Intradermal injections | | | |
| - Intramuscular injections | | | |
| - Intravenous injections | | | |
| - IV Push/ Bolus | | | |
| - Nebulizer | | | |
| <ul style="list-style-type: none"> • Consult appropriate sources for the necessary information regarding unfamiliar medications e.g. Direct vasodilator, Beta agents | | | |
| The Nurse intern is able to describe the following: | | | |
| <ul style="list-style-type: none"> • The supply of drugs to the wards/unit | | | |
| <ul style="list-style-type: none"> • The safe keeping of ward stock drugs in the drug cupboard and refrigerator | | | |
| <ul style="list-style-type: none"> • The correct checking & administration of all medication administration | | | |
| <ul style="list-style-type: none"> • The appropriate documentation related to medication administration | | | |
| <ul style="list-style-type: none"> • The supply of medication to patients being transferred | | | |
| <ul style="list-style-type: none"> • Documentation and report related to Drug errors | | | |
| 14. Controlled & Narcotic Drugs | | | |
| The Nurse Intern is able to discuss & competently demonstrate the following activities | | | |
| <ul style="list-style-type: none"> • The procedure for incidents of Narcotic & Control Drug breakages or errors | | | |
| <ul style="list-style-type: none"> • The administration of a controlled or narcotic medication to a patient | | | |
| <ul style="list-style-type: none"> • The correct procedure in dispensing a controlled or narcotic drug using the narcotic drug register | | | |
| 15. IV Therapy (Cannulation/Lines) | | | |
| The Nurse Intern is able to demonstrate the appropriate techniques of the | | | |

| | | | |
|--|--|--|--|
| following | | | |
| <ul style="list-style-type: none"> • Insertion of an IV Cannula, maintaining an IV cannula/Heplock | | | |
| <ul style="list-style-type: none"> • Measuring & documenting input and output | | | |
| <ul style="list-style-type: none"> • Regulating IV | | | |
| <ul style="list-style-type: none"> • Changing an IV site dressing | | | |
| Demonstrate ability to use IV devices: | | | |
| <ul style="list-style-type: none"> • Set up and regulation of IV infusion pumps | | | |
| <ul style="list-style-type: none"> - The calculation of proper concentration and rate of infusion | | | |
| <ul style="list-style-type: none"> - The dilution strength of fluids and the time required for infusions | | | |
| 16. Identify needs for communication with other facilities e.g. OPD clinics, wards-ray dep., OR. | | | |
| 17. Able to response to code and function as a cardiac arrest team | | | |
| 18. Infection Control | | | |
| The Nurse Intern will be able to: | | | |
| <ul style="list-style-type: none"> • Demonstrate appropriate hand washing technique (as Indicated by WHO "Five Moment") | | | |
| <ul style="list-style-type: none"> • Apply principles of aseptic techniques in performing | | | |
| <ul style="list-style-type: none"> - Dressing change | | | |
| <ul style="list-style-type: none"> - IV cannulation | | | |
| <ul style="list-style-type: none"> - Universal/standard precautions | | | |
| <ul style="list-style-type: none"> - The Post Mortem Policy | | | |
| <ul style="list-style-type: none"> • Disposes waste/Materials appropriately | | | |
| 19. Locate patient room equipment /supplies | | | |
| <ul style="list-style-type: none"> • Emergency call button | | | |
| <ul style="list-style-type: none"> • Oxygen flowmeter | | | |
| <ul style="list-style-type: none"> • Suction regulator/Bottles | | | |

| 9. Admission, Transfer and discharge: | | | |
| The Nurse Intern can demonstrate the following: | | | |
| • The routine admission transfer and discharge of a patient | | | |
| • The care of a patients valuable | | | |
| 10. General Nursing Skills | | | |
| The Nurse Intern is able to complete the following activities: | | | |
| - Measuring & recording of : | | | |
| • Vital Signs & related Observations: | | | |
| - Temperature | | | |
| - Pulse Rate | | | |
| - Respiratory Rate | | | |
| - Blood Pressure | | | |
| • Pulse Oximetry Set-up & Reading | | | |
| • Height & Weight | | | |
| • Documentation of Pt. vital signs, oxygen saturation, height and weight. | | | |
| 11. Medication Administration | | | |
| The Nurse Intern is observed to consistently demonstrate high level of care & maintenance to the policy related to the administration of medications by the following routes | | | |
| - Subcutaneous injections | | | |
| - Intradermal injections | | | |
| - Intramuscular injections | | | |
| - Intravenous injections | | | |

| | | | |
|---|--|--|--|
| - IV Push/ Bolus | | | |
| - Nebulizer | | | |
| • Follow hospital policy for Documentation of drug administration | | | |
| • Consult appropriate sources for the necessary information regarding unfamiliar medications e.g. Direct vasodilator, Beta agents | | | |
| The Nurse intern is able to describe the following: | | | |
| • The supply of drugs to the wards/unit | | | |
| • The safe keeping of ward stock drugs in the drug cupboard and refrigerator | | | |
| • The correct checking & administration of all medication administration | | | |
| • The appropriate documentation related to medication administration | | | |
| • The supply of medication to patients being transferred | | | |
| • Documentation related to Drug errors | | | |
| 12. Controlled & Narcotic Drugs | | | |
| The Nurse Intern is able to discuss & competently demonstrate the following activities | | | |
| • The procedure for incidents of Narcotic & Control Drug breakages or errors | | | |
| • The administration of a controlled or narcotic medication to a patient | | | |
| • The correct procedure in dispensing a controlled or narcotic drug using the narcotic drug register | | | |
| 13. IV Therapy (Cannulation/Lines) | | | |
| The Nurse Intern is able to demonstrate the appropriate techniques of the following | | | |
| • Insertion of an IV Cannula, maintaining an IV cannula/Heplock | | | |
| • Measuring & documenting input and output readings | | | |
| • Regulating IV | | | |
| • Changing an IV site dressing | | | |
| Demonstrate ability to use IV devices: | | | |
| • Set up and regulation of IV infusion pumps | | | |
| - The calculation of proper concentration and rate of infusion | | | |
| - The dilution strength of fluids and the time required for infusions | | | |
| 14. Identify needs for communication with other facilities e.g. OPD clinics, wards-ray dep., OR. | | | |
| 15. Able to response to code and function as a cardiac arrest team | | | |
| 16. Infection Control | | | |
| The Nurse Intern will be able to: | | | |
| • Demonstrate appropriate hand washing technique (as Indicated by WHO “Five Moment”) | | | |
| • Apply principles of aseptic techniques in performing | | | |
| - Dressing change | | | |
| - IV cannulation | | | |
| • The Nurse Intern will be able to discuss: | | | |
| - Universal/standard precautions | | | |
| - The Post Mortem Policy | | | |
| • Disposes waste/Materials appropriately | | | |
| 17. Circulating Nurse Role and Responsibilities: | | | |
| The Nurse Intern is able to demonstrate the appropriate techniques of the following | | | |
| ▪ Check OR list for procedures of the day | | | |
| ▪ Receive patient and check his identity with ID Band and file. | | | |
| ▪ Assesses the cardiovascular, pulmonary, neurological, renal and vascular status of the patient. | | | |
| ▪ Checks the patient’s laboratory results | | | |
| ▪ Informs the physician immediately if there are any problems or critical information in regard to the patient | | | |

| | | | |
|---|--|--|--|
| - Administers proper preparation and interventions pri-operative: | | | |
| ▪ Prepares the procedure room appropriately for the procedure. | | | |
| ▪ Tests the operation of light, suction machine, cardiac monitors, defibrillator, additional monitor &defibrillator, ECG machine. | | | |
| ▪ Ensure availability of Intubation tray: Oral, nasal airways/laryngoscope handle/blades., pacemaker devices, supplies, and other equipment to be used. | | | |
| ▪ Promotes physical comfort and safety when transporting, lifting and positioning patient. | | | |
| ▪ Operate the defibrillator when needed in emergency situations, prepare external pacemaker device as needed. | | | |
| ▪ Assists the anesthetist with intubation. | | | |
| ▪ Assist, observe the scrub nurse in setting sterile instruments in the mayo table | | | |
| ▪ | | | |
| ▪ Transfer the patient to the recovery room after properly fixing the patient’s gown and assuring patient is stable for transfer. | | | |
| ▪ Cleaning and disinfection of RR stretchers in between patients. | | | |
| ▪ Prepare supplies & patients files for the following day. | | | |
| ▪ Preparation of patient's files for the following day. | | | |
| 18 . Scrub Nurse Role and Responsibilities | | | |
| ▪ Proper gowning, gloving | | | |
| ▪ Reviews the patient’s status during the case: | | | |
| ▪ Gives relevant information about the patient’s status and call other nurse’s attention to any special endorsement or medications. | | | |
| ▪ Basic knowledge of surgical instruments, supplies, drapes, gown etc. in the working table | | | |
| ▪ Observes the importance of maintaining sterility of the field and the unit. | | | |
| ▪ Prepares the operative site properly with the use of povidone iodine and chlorhexidine (as order). | | | |
| ▪ Prepare the instruments and equipment’s are used for procedures/OR &when they are needed. | | | |
| - Notifies the physician of any status changes from the patient and administer appropriate care: | | | |
| ▪ Identifies risks (Air embolism, over volume injection etc.) during procedure and applies appropriate interventions. | | | |
| ▪ Inform any untoward signs to the surgeon e.g. bleeding, hematoma. | | | |
| ▪ Monitors intravenous fluids, vital signs, effects of sedatives and reports any untoward data, signs and symptoms. | | | |
| ▪ Count all sponges, instruments, needles and other tools before &after surgery &inform surgeon of the count. | | | |
| ▪ Prepare the pt. to transfer him to the recovery room | | | |
| ▪ Packing of instruments before sending to CSSD | | | |
| 18. Recovery Room Nurse Role and Responsibilities: | | | |
| The Nurse Intern is able to demonstrate the appropriate techniques of the following | | | |
| 1. Assesses patient’s condition post procedure: | | | |
| ▪ Monitors patient’s vital signs | | | |
| - Attach the patient to cardiac monitor (as needed) | | | |
| ▪ Check for any signs and symptoms of: | | | |
| - Potential respiratory dysfunction | | | |
| - Alterations in cardiac output | | | |
| - Alterations/changes in hydration status | | | |
| - Alterations in temperature | | | |
| - Altered LOC | | | |
| - Presence of pain | | | |
| 2. Answers patient’s questions regarding the procedure and provides information or health | | | |

| | | | |
|--|--|--|--|
| teachings related to the procedure: | | | |
| 3.Reports any changes in patient’s dressing site or operative site: | | | |
| ▪ Check for the presence of bleeding or hematoma | | | |
| 4. Observes for any changes in patient’s status and provides appropriate treatment and interventions needed. | | | |
| ▪ Provides appropriate pain management post procedure | | | |
| ▪ Applies proper Advance Cardiac Life Support during Code Blue | | | |
| ▪ Familiarization on RR documents used for effective recording and reporting | | | |
| Transfer pt. back to ward with the preceptor and to be oriented with proper reporting of post-operative patient. | | | |
| 19.Documentation Nurse Role and Responsibilities: | | | |
| The Nurse Intern is able to demonstrate the following: (according to the policy) | | | |
| 1. Assesses patient chart for appropriate pre-procedure data and interventions: | | | |
| ▪ Receives endorsement from the Unit Nurse using SBAR method. | | | |
| 2. Assesses patient’s knowledge base/needs in regard to age, education and level of consciousness: | | | |
| ▪ Explains to the patient prior to the procedure what is expected inside OR. | | | |
| ▪ Provides appropriate health teachings to the patient/family after the procedure. | | | |
| 3. Reviews the patient’s status during the surgical time-out together with the team. | | | |
| 5. Notes all information and interventions done to patient and documents it on the chart. | | | |
| ▪ Documents patient data and outcomes, pre, intra and post-operative. | | | |
| ▪ Documents all interventions and management done on patients pre, intra and post-operative. | | | |
| ▪ Endorses the patient properly to the Nurse in recovery room using SBAR method. | | | |
| ▪ Complete the Kardex accurately | | | |
| ▪ Familiarization on HIS (health information System) of the hospital | | | |

- Request should be submitted 2 weeks before Activity date
يجب تقديم الطلب أسبوعين قبل تاريخ الدورة التعليمية
- Each intern is allowed for a maximum of 6 Educational Activity to be approved by the administration
لكل طالب الحق بحضور 6 دورات تعليمية خلال فترة الامتياز فقط لا غير بموافقة الإدارة
- Only 30% of the group can attend and the priority to those who register first
فقط 30% من المجموعة تستطيع حضور الدورة التعليمية والأولية بأسبقية التسجيل
- Please submit the approved request to the unit manager to be kept in the file and as a notification of approval
الرجاء تسليم نموذج الموافقة إلى القسم كإشعار بموافقة الإدارة ومن ثم يحفظ في الملف
- Copy of Educational Activity Certificate should be submitted to the unit after attendance otherwise it will be considered as absent without excuse
تزويد القسم بصورة من شهادة حضور الدورة التعليمية و إلا سيحتسب هذه الأيام غياب بدون عذر

Nursing Internship program Warning letter

Date: _____

Warning NO. ()

Name of Intern: _____

Batch: _____

ID#: _____

Group: _____

Rotation: _____

You are counseled to the following:

- Not adhering to dress code
 - Unprofessional attitude or behavior
 - Going out without prior approval
 - Absences more than 25% of the rotation
 - Falsification (for evaluation or absences)
 - Not follow the instruction
 - Other
-

Also, be informed that after receiving one counseling letter the second will be a warning letter resulting in below disciplinary action:

- First warning letter: 2 days compensation.
- Second warning letter: Reduce days of emergency leave
- Third warning letter: Repeat one rotation
- Forth warning letter: Referred to College Council

Nursing intern signature: _____

Coordinator Clincial & Internship Affairs: _____
