PREFACE

The idea to prepare this book came from H.E. Prof. Abdullah Al-Rubaish, the President of University of Dammam. He requested our Ex-Chairman, Dr. Abdullah Al-Hwiesh to compile all the publications of our faculty staff since the start of our university (formerly King Faisal University). Dr. Al-Hwiesh took it as a challenge and the responsibility to collect the manuscripts and compile them into PDF format was given to Dr. Abdelhaleem Bella and Mr. Ramesh Kumar.

The book is divided into six volumes that contain 594 manuscripts in which our faculties were involved as first authors or coauthors. The names of our faculties are highlighted in italic blue color fonts (as seen in Volume I). The manuscripts are arranged in chronological order starting from the most recent published manuscripts. As such, Volume 1 will have the recent publications. Subject index and author index are inserted in Volume 1 for quick reference. A soft copy of the book will also be available in the department.

We are thankful to H.E. Prof. Abdullah Al-Rubaish for his continuous support and guidance to the Department of Internal Medicine.

We are greatly indebted to Dr. Al-Hwiesh, Dr. Bella and Mr. Kumar for their efforts to publish this book. It took almost six months for them to accomplish this task. Without their sincere efforts it would have not been possible to publish this book in this short period despite their busy schedule with other official commitments. We are also thankful to all our past and present faculty members for having provided the list of their publications with the available soft and hard copies.

We dedicate this book to all our former and present members of the Department.

*Waleed Albaker, FRCP(C)
Chairman
Department of Internal Medicine*

A WORD FROM THE EDITORIAL TEAM

“If I have seen further than others, it is by standing on the shoulders of the giants”

Isaac Newton

When we were given the assignment to organize the publications of the Department of Medicine faculty, it seemed easy at first but proved to be challenging and only then did we realize the importance of this project. The great work of our previous and current colleagues is now available to access and recognize. Many have published in different types of journals, some of which aren't available to the main search databases, which makes this published work invisible.

We enjoyed the journey; collecting the publications, transforming them to PDF, organizing and indexing them to produce an incredible six volumes!!

We acknowledge that some publications were not available to us and we hope in the future to add those to a supplement to this book. We also included some previous work for the faculty members which might have been performed at other institutions. These were not many but we felt it will add to the understanding of the research work done by them.

“When we look outside we dream but when we look inside we awaken” –a quote which reflects the two dimensions our organization works on: looking at other institutions to benchmark and collaborate and so improve. To look inside and awaken is what this book is about: it informs us of what we have been doing to help guide our future work. Self recognition is the start for improvement.

If there are any deficiencies we apologise in advance and hope to correct that in the future, at least the two of us (A.Bella & Ramish Kumar) had no experience in such work, but the honour of doing it was the driving force helped by the guidance of the Chairman of the Department of Medicine and The President of the University.

Abdelhaleem Bella

LIST OF ALL THE MANUSCRIPTS INCLUDED IN VOL I - VOL VI

No	Year	Publication	Page
1.	2013	Abdul-Rahman IS, Al-Hwiesh AK. Gastroduodenal lesions in peritoneal dialysis patients: the role of Helicobacter pylori infection. Italian Journal of Medicine 2013;7:168-75.	1
