Imam Abdulrahman Bin Faisal University (IAU) track applications & admissions of underrepresented (and potentially underrepresented) groups including ethnic minorities, low income students, non-traditional students, women, LGBT students, disabled students, and newly settled refugee students

IAU gives importance of all the groups and doesn't discriminate them. Inclusion of all sects and groups is the moto of IAU.

IAU constantly monitors whether any discrimination is happening in IAU campuses due to disability. IAU has created a policy and teaches the staff and students to adhere it strictly which protects disabled people to be discriminated at IAU campuses.

Find below some of our services at IAU.

1. Saudi Association for Hearing Impairment

College #طب_الأسنان held a workshop on the “#فاهمينك Initiative” in cooperation with the Saudi Association for Hearing Impairment, targeting intern doctors with the aim of **enhancing communication skills with patients with hearing impairments.**

The college extends its sincere thanks and appreciation to all the volunteers for their valuable efforts that contributed to the success of the workshop.

Care Unit for Students with Disabilities

Introduction

Imam Abdul Rahman bin Faisal University (IAU) strives to enable individuals with disabilities and empower them in the university community and in the society in general. The university is making necessary arrangements to the learning environment to be appropriate, attractive, and accessible for all students, regardless of their type of disability. Special Education Department was established in the university over a decade ago, and it has played a critical role in preparing qualified special education teachers in accordance with the standards of specialized national and international organizations.

In the line with the university vision in providing fundamental and assistive services to students with disabilities, the Care Unit for Students with Disabilities has been formed, and it is supervised by a qualified team of specialists in the field of special education. The Unit seeks to meet the needs of students with disabilities; identify the obstacles they might encountered during their education journey in the university, offers recommendation to eliminate these obstacles and makes the necessary adjustments.

The Unit aims to establish the principles of integrating students with disabilities in the campus community and ensure an inclusive learning experience by providing them with the possible opportunities to participate actively in all events that will promote their social life. In this regard, the unit offers pastoral care services for students with disabilities including individual preparation programs, to aid students in their social and psychological well-being. In addition, the unit pays great attention to Twice-Exceptional Students in the university, considers their substantial abilities, provides them with a stimulating environment that develops their talents and seeks the opportunities to be benefited from their talents.

Vision

Imam Abdul Rahman bin Faisal University (IAU) strives to **enable individuals with disabilities and empower them** in the university community and in the society in general. The university is making necessary arrangements to the learning environment to be appropriate, attractive, and accessible for all students, regardless of their type of disability. IAU Celebrate the First Batch of the Admin. Communication Skills Diploma for Deaf

Under the patronage and presence of His Excellency the President of the University, Dr. Abdullah Al-Rubaish, the College of Education at Imam Abdulrahman bin Faisal University celebrated the graduation of 17 graduates of the first batch of the Administrative Communication Skills Diploma for Deaf. The community service was an essential component of the university's mission, and this program is one of the aspects in which the university interacted with the community. The President added, at King Fahd Hospital of the University, we have a cochlear implant program in which 200 cochlear implant surgery were conducted successfully. Services and full care were provided through specialists, who have been rehabilitated, educated, and prepared to overcome this difficulty. Today, the university has another new educational program for visually impaired students.

Gifted students with Learning Disabilities

Course Description

The course addresses a category that often does not receive sufficient attention and care: gifted individuals with learning difficulties. In this course, students will explore the concept of dual exceptionality and discuss the historical scientific literature related to this group. They will learn to distinguish between the characteristics associated with giftedness and those related to learning difficulties, as well as the best methods for identifying these individuals and assisting them in addressing their challenges in reading, writing, and mathematics. Furthermore, the course will cover ways to develop their talents.

16. Meeting hosted by IAU with the Deans of Admission and Registration in the GCC Countries

IAU Hosts a Meeting for the Deans of Admission and Registration in the GCC Countries

Under the patronage of the President of Imam Abdulrahman bin Faisal University, Dr. Abdullah Al-Rubaish, the university, represented by the Deanship of Admission and Registration, will host a meeting for the Deans of Admission and Registration in the GCC countries next Thursday, in one of the hotels in Al-Khobar. **In this meeting, the second topic will address the admission of students with disabilities and the available specializations. It deals with the classification of disabilities in alignment with the considered classifications of the GCC countries. It addresses the procedures, mechanisms, and standards adopted in accepting students with types of disabilities that can be joined to university majors, and the impact of that on the outcomes. It also discusses the global experiences of the adaptations provided to disabled students, and the difficulties that universities face after accepting them, in addition to allocating special programs, curricula, and teaching methods for them or integrating them into available programs. The best experiences, practices, success stories, and supporting indicators can be mentioned as an example.**

IAU Hosts 19th Meeting for the Deans of Admission and Registration in the GCC Countries in 2023

Under the patronage of His Excellency the President of Imam Abdulrahman bin Faisal University, Dr. Abdullah Al-Rubaish, the 19th Meeting of the Deans of Admission and Registration at the universities and higher education institutions in the GCC Countries was launched. It was held on October 5, 2023, and lasted for a day in Dammam. In this meeting, **all the contributions and academic papers presented at this meeting are considered specialized academic consultations that universities are keen to benefit from. These papers focused on common interests and concerns in aspects related to university admission for talented, disabled, and international students and it is highly contributing to achieve the goals of the institutional and programmatic accreditations.** The second topic addresses the admission of students with disabilities and the specializations available to them. It discusses the classification of disabilities that is aligned with the considered classifications of the GCC Countries. It addresses the procedures, mechanisms, and standards adopted in accepting students with types of disabilities that can be joined to university majors, and the impact of that on the outcomes. It also discusses the global experiences of the adaptations provided to disabled students, and the difficulties that universities face after accepting them, in addition to allocating special programs, curricula, and teaching methods for them or integrating them into available programs. 18. Physiotherapy and Occupational Therapy Services Provided at KFHU of IAU for Individuals with Disabilities

جامعة الإمام عبد الرحمن بن فيصل
IMAM ABDULRAHMAN BIN FAISAL UNIVERSITY

Home / University Hospitals / King Fahd Hospital of the University / Medical Services / Physiotherapy Department

Physiotherapy Department

Physiotherapy Department rendered services thru electronic referrals with clear diagnosis and precautions from the concerned dept. as needed. Physical Therapist will contact the referring physician for anything related to the patient.

The inpatient units that depend on Physiotherapy services are Critical Care Units (CCU, CCU), Orthopedic, Neurosurgery, General Surgery, Neurology, Internal Medicine and Pediatric.

The physiotherapy services may include relief of pain, improve the range of motion, improved the muscle power, training of activity of daily living, gait training and improving human performance.

Occupational Therapy is under the umbrella of physiotherapy department. It also considers the physical aspects of rehabilitation and motion, but it is focused primarily on enabling the patient to engage in the meaningful activities of daily life as seamlessly as possible. Occupational Therapists are dedicated to assisting patients in the long-term through therapeutic adaptations to their environments that fit in their specific functional limitations.

Physiotherapy Department staffed with highly qualified Physical Therapists, Occupational Therapists, and Physiotherapy Clinicians.
