Imam Abdulrahman Bin Faisal University (IAU) provides accessible facilities for people with disabilities.

All IAU campuses are fully accessible for disabled people. They don't require anyone to assist them. They can easily carry out their everyday tasks in IAU without requiring any assistance since all facilities and privileges are provided to them.

All IAU buildings are constructed in keeping disabled people in mind and that is why all IAU campuses are a convenient place for disabled people to easily access.

Find below some of our services at IAU.

1. IAU Facilities for People with Disabilities

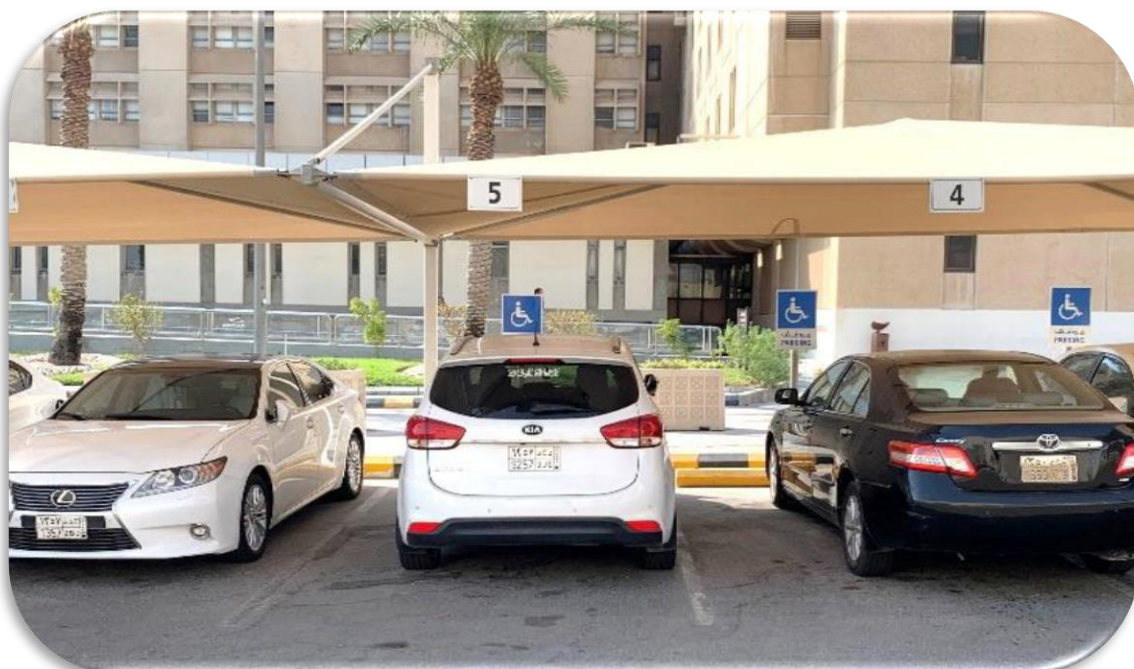

Ramp facility for Disabled at the entrance of every facility building of the IAU campus

Disabled patient ramp (IAU) at the entrance of Each College (IAU)

Disabled parking in IAU

Disabled parking in IAU

Disabled Parking slots

Disabled students parking and entry at the indoor sports

Disabled Chair at IAU and KFHU

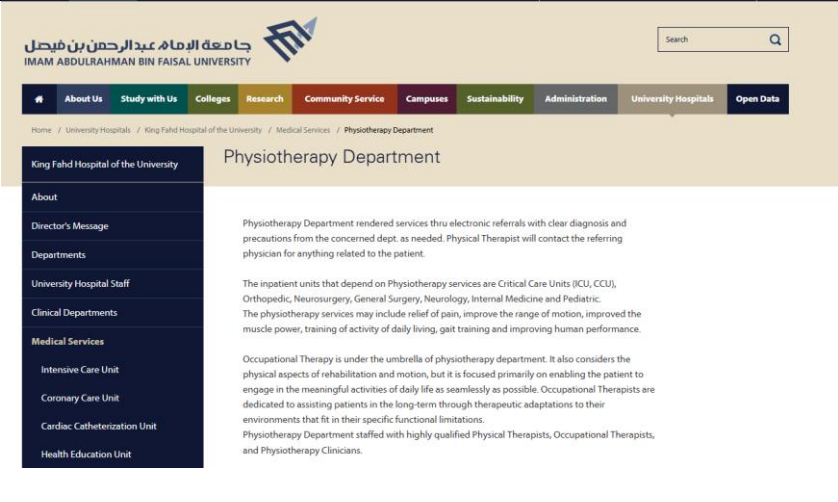

Rest Rooms for Differently Abled

University Free Transportation for maternity care & disabled faculty and students

2. Physiotherapy and Occupational Therapy Services Provided at KFHU of IAU for Individuals with Disabilities

	Physiotherapy Department Physiotherapy Department rendered services thru electronic referrals with clear diagnosis and precautions from the concerned dept. as needed. Physical Therapist will contact the referring physician for anything related to the patient. The inpatient units that depend on Physiotherapy services are Critical Care Units (CCU, CCU), Orthopedic, Neurosurgery, General Surgery, Neurology, Internal Medicine and Pediatric. The physiotherapy services may include relief of pain, improve the range of motion, improved the muscle power, training of activity of daily living, gait training and improving human performance. Occupational Therapy is under the umbrella of physiotherapy department. It also considers the physical aspects of rehabilitation and motion, but it is focused primarily on enabling the patient to engage in the meaningful activities of daily life as seamlessly as possible. Occupational Therapists are dedicated to assisting patients in the long-term through therapeutic adaptations to their environments that fit in their specific functional limitations. Physiotherapy Department staffed with highly qualified Physical Therapists, Occupational Therapists, and Physiotherapy Clinicians.
	- Assistive walking aids Occupational therapy performance area: - Activity of daily living (ADL) - Productivity (work) - Leisure (play) Occupational therapist assessed the following: - Sensory motor component like muscles power - Psychosocial component like social interaction - Cognitive component like memory Occupation therapy provides patient-centered service like but not limited to: - Cerebral palsy - Stroke - Head injuries - Erb's palsy - Spinal cord injuries - Down syndrome - Mental health difficulties - Upper limbs injuries Hours of Service Provision 8:00 am to 3:00 pm Sunday – Thursday.

Special Education Department

As one of the highest goals of the vision of the Kingdom of Saudi Arabia 2030 is to raise the country to be a pioneering model at all levels, it was important to raise awareness and attention to the individuals with special needs and enable them to engage in the community to be able to contribute actively in the development and construction and accelerate the process . Hence, the Department of Special Education at the University of Imam Abdul Rahman bin Faisal intended to improve the quality and quality of services provided to individuals with special needs in order to achieve excellence and uniqueness at the local and global levels in the field of special education. This vision can be achieved by the presence of selected qualified faculty members with scientific and practical experience and who are equipped with the latest knowledge, experience and practices in the field of special education. In this sense, it is important to present this site as a comprehensive guide to everything related to the special education department of Imam Abdul Rahman bin Faisal University in terms of vision, mission, objectives, organizational structure of the department and the department's available programs.

Vision

Prepare specialized professional teachers to serve students with special needs as well as fulfill their desires and ambitions.

Special Education Department in the College of Education of IAU for Individuals with Special Needs

Gifted students with Learning Disabilities

Course Description

The course addresses a category that often does not receive sufficient attention and care: gifted individuals with learning difficulties. In this course, students will explore the concept of dual exceptionality and discuss the historical scientific literature related to this group. They will learn to distinguish between the characteristics associated with giftedness and those related to learning difficulties, as well as the best methods for identifying these individuals and assisting them in addressing their challenges in reading, writing, and mathematics. Furthermore, the course will cover ways to develop their talents.

10. Meeting hosted by IAU with the Deans of Admission and Registration in the GCC Countries

IAU Hosts a Meeting for the Deans of Admission and Registration in the GCC Countries

Under the patronage of the President of Imam Abdulrahman bin Faisal University, Dr. Abdullah Al-Rubaish, the university, represented by the Deanship of Admission and Registration, will host a meeting for the Deans of Admission and Registration in the GCC countries next Thursday, in one of the hotels in Al-Khobar. **In this meeting, the second topic will address the admission of students with disabilities and the available specializations. It deals with the classification of disabilities in alignment with the considered classifications of the GCC countries. It addresses the procedures, mechanisms, and standards adopted in accepting students with types of disabilities that can be joined to university majors, and the impact of that on the outcomes. It also discusses the global experiences of the adaptations provided to disabled students, and the difficulties that universities face after accepting them, in addition to allocating special programs, curricula, and teaching methods for them or integrating them into available programs. The best experiences, practices, success stories, and supporting indicators can be mentioned as an example.**

<https://www.iau.edu.sa/en/news/iau-hosts-a-meeting-for-the-deans-of-admission-and-registration-in-the-gcc-countries>

IAU Hosts 19th Meeting for the Deans of Admission and Registration in the GCC Countries in 2023

Under the patronage of His Excellency the President of Imam Abdulrahman bin Faisal University, Dr. Abdullah Al-Rubaish, the 19th Meeting of the Deans of Admission and Registration at the universities and higher education institutions in the GCC Countries was launched. It was held on October 5, 2023, and lasted for a day in Dammam. In this meeting, **all the contributions and academic papers presented at this meeting are considered specialized academic consultations that universities are keen to benefit from. These papers focused on common interests and concerns in aspects related to university admission for talented, disabled, and international students and it is highly contributing to achieve the goals of the institutional and programmatic accreditations.** The second topic addresses the admission of students with disabilities and the specializations available to them. It discusses the classification of disabilities that is aligned with the considered classifications of the GCC Countries. It addresses the procedures, mechanisms, and standards adopted in accepting students with types of disabilities that can be joined to university majors, and the impact of that on the outcomes. It also discusses the global experiences of the adaptations provided to disabled students, and the difficulties that universities face after accepting them, in addition to allocating special programs, curricula, and teaching methods for them or integrating them into available programs. The best experiences, practices, success stories, and supporting indicators can be mentioned as an example.

11. IAU celebrated the graduation of 17 graduates of the first batch of the Administrative Communication Skills Diploma for Deaf

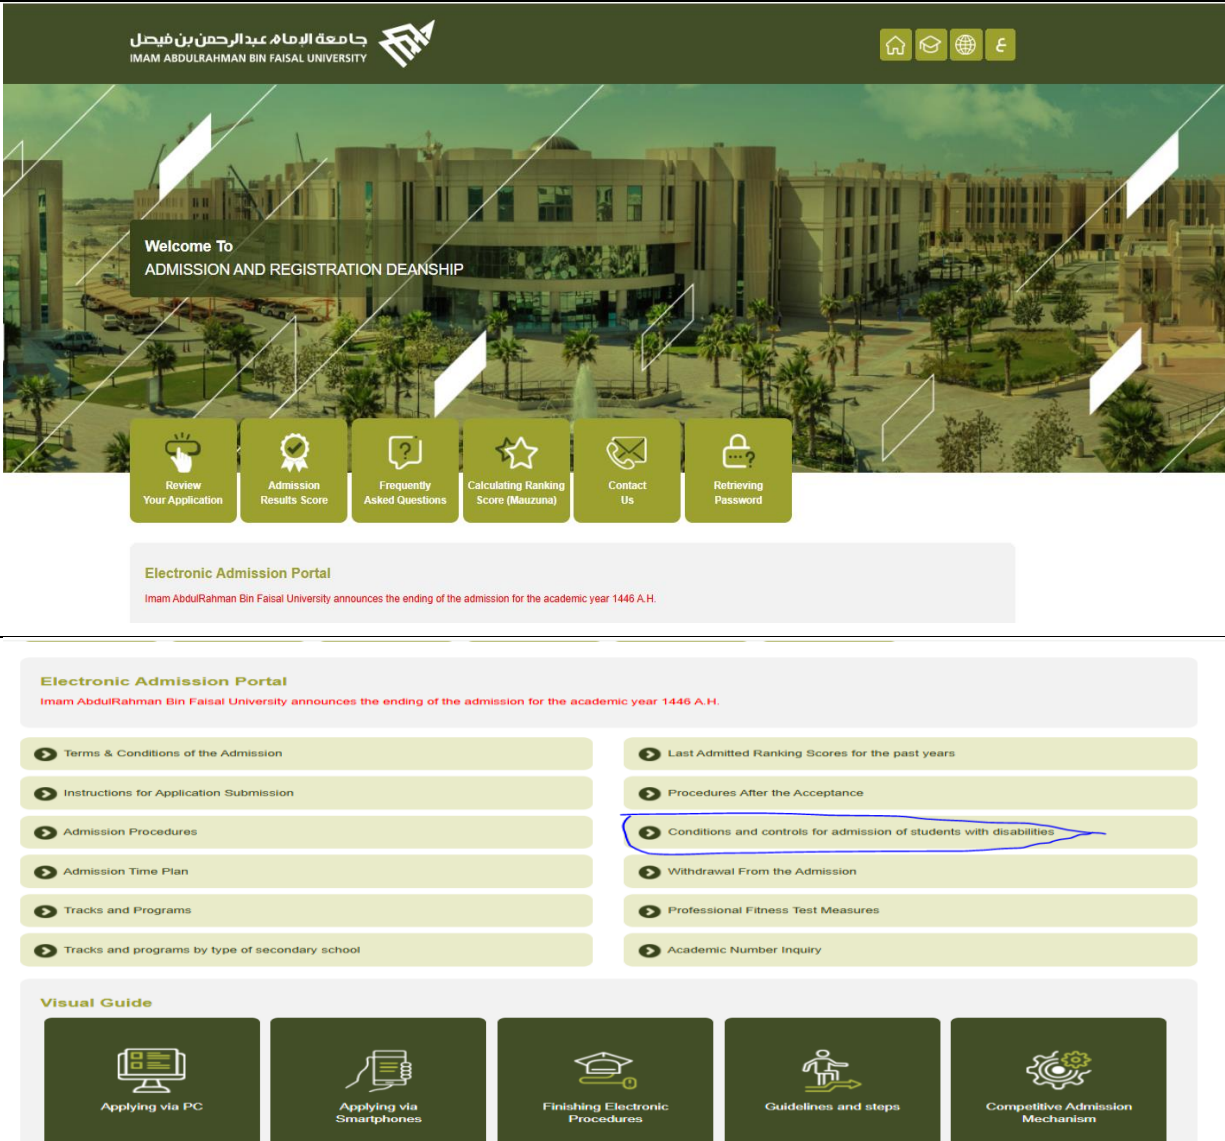

IAU Celebrate the First Batch of the Admin. Communication Skills Diploma for Deaf

Under the patronage and presence of His Excellency the President of the University, Dr. Abdullah Al-Rubaish, the College of Education at Imam Abdulrahman bin Faisal University celebrated the graduation of 17 graduates of the first batch of the Administrative Communication Skills Diploma for Deaf. The community service was an essential component of the university's mission, and this program is one of the aspects in which the university interacted with the community. The President added, at King Fahd Hospital of the University, we have a cochlear implant program in which 200 cochlear implant surgery were conducted successfully. Services and full care were provided through specialists, who have been rehabilitated, educated, and prepared to overcome this difficulty. Today, the university has another new educational program for visually impaired students.

12. IAU Admission Portal Information for Students with Disabilities

The screenshot displays the IAU Admission Portal interface. At the top, there is a header with the university's name in Arabic and English, and navigation icons. Below the header is a large banner image of the university campus with the text "Welcome To ADMISSION AND REGISTRATION DEANSHIP". Underneath the banner are six green buttons: "Review Your Application", "Admission Results Score", "Frequently Asked Questions", "Calculating Ranking Score (Mauzuna)", "Contact Us", and "Retrieving Password".

Below the buttons is a section titled "Electronic Admission Portal" with a red announcement: "Imam AbdulRahman Bin Faisal University announces the ending of the admission for the academic year 1446 A.H.".

The main content area is divided into two columns of links. The left column includes: "Terms & Conditions of the Admission", "Instructions for Application Submission", "Admission Procedures", "Admission Time Plan", "Tracks and Programs", and "Tracks and programs by type of secondary school". The right column includes: "Last Admitted Ranking Scores for the past years", "Procedures After the Acceptance", "Conditions and controls for admission of students with disabilities" (highlighted with a blue circle and a blue arrow), "Withdrawal From the Admission", "Professional Fitness Test Measures", and "Academic Number Inquiry".

At the bottom, there is a "Visual Guide" section with five icons: "Applying via PC", "Applying via Smartphones", "Finishing Electronic Procedures", "Guidelines and steps", and "Competitive Admission Mechanism".
