The advertisement features the IAU logo at the top left and the text "WAYS Solutions are now activated" in a yellow box at the top right. Below this, Arabic text describes the app's purpose: "تتسرف جامعة الإمام عبدالرحمن بن فيصل ممثلة بعمادة خدمة المجتمع والتنمية المستدامة إطلاق المرحلة التجريبية لخدمة التنقل الذكي من خلال توليد الطاقة النظيفة داخل الحرم الجامعي بواسطة الدراجات والسكوتر الإلكتروني من خلال تطبيق WAYS".

In the center, there is a yellow box with the text "WEAR A HELMET! ارتد خوذةك!" and a calendar icon showing the date "2024-09-24". To the left, there are buttons for downloading the app from the "App Store" and "Google Play". At the bottom, the IAU logo and the text "جامعة الإمام عبد الرحمن بن فيصل" are visible.

WAYS App launched to monitor and guide the E-Scooter riders

IAU achieves 100% in the Field of Improving Energy Efficiency Consumption 2022

Imam Abdulrahman bin Faisal University obtained 100% in the scorecard for the year 2022 and the excellence award for the first category in the field of improving energy efficiency consumption, during a ceremony honoring distinguished government agencies in improving energy consumption for the year 2022, which was held by the Saudi Center for Energy Efficiency, in the presence of the Vice President for Administrative and Financial Affairs, head of the university's energy efficiency team, Prof. Dr. Abdulwahed Al-Mazrou, and many officials and representatives of government agencies. The university's win came for achieving 100% in the scorecard, which includes achieving levels of commitment in energy consumption after implementing a set of internal initiatives to improve energy consumption rates in all university facilities and buildings and university hospitals, including the application of the necessary standards to raise the efficiency of consumption, the adoption of the necessary models and guidelines, and the holding of technical workshops.

IAU achieves 100% in the Field of Improving Energy Efficiency Consumption 2022

Imam Abdulrahman bin Faisal University obtained 100% in the scorecard for the year 2022 and the excellence award for the first category in the field of improving energy efficiency consumption, during a ceremony honoring distinguished government agencies in improving energy consumption for the year 2022, which was held by the Saudi Center for Energy Efficiency, in the presence of the Vice President for Administrative and Financial Affairs, head of the university's energy efficiency team, Prof. Dr. Abdulwahed Al-Mazrou, and many officials and representatives of government agencies. The university's win came for achieving 100% in the scorecard, which includes achieving levels of commitment in energy consumption after implementing a set of internal initiatives to improve energy consumption rates in all university facilities and buildings and university hospitals, including the application of the necessary standards to raise the efficiency of consumption, the adoption of the necessary models and guidelines, and the holding of technical workshops.

7. Published Research on Sustainability by IAU

Number of Scholarly Publications on Sustainability:

Scopus Indexed: 813 publications by IAU researchers in 2024

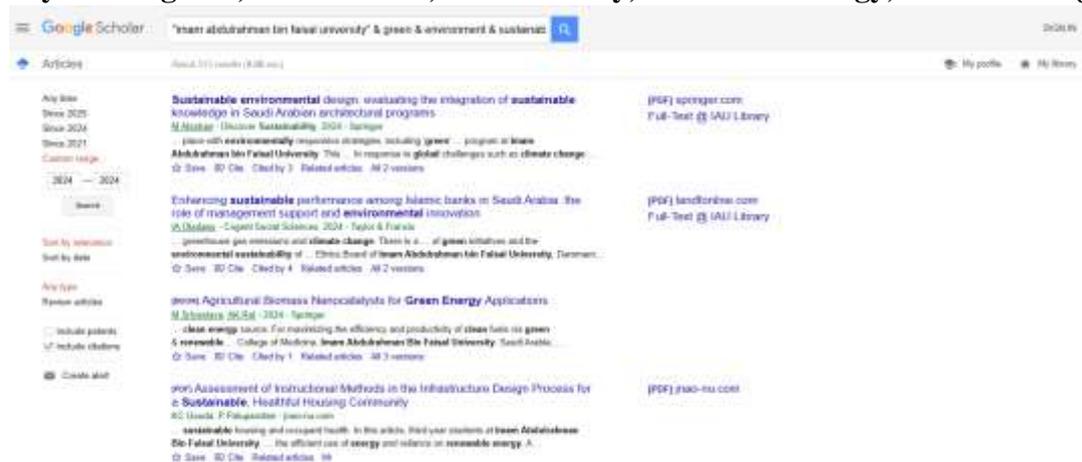

Google Scholar: 313 publications by IAU researchers in 2024

1. Number of indexed publications (Scopus Indexed reputable journal) on environment and sustainability, published in one year period, using keywords: green, environment, sustainability, renewable energy, climate change:

The number of scholarly publications on environment and sustainability that were published by IAU researchers in Scopus-indexed reputable journals in 2024 was retrieved using **Scival software (as of 23.10.2025)** and keywords such as green, environment, sustainability, renewable energy, and climate change, and is shown below:

IAU & its affiliations	Scopus Indexed Publications
Imam Abdulrahman Bin Faisal University	813
Total Publication with IAU and affiliations used by its researchers	813

2. Number of indexed publications (Google scholar Indexed reputable journal) on environment and sustainability, published in one year period, using keywords: green, environment, sustainability, renewable energy, climate change:

Search method: "imam abdulrahman bin faisal university" & green & environment & sustainability & renewable energy & climate change

Description:

As in the above presented screenshot the scholarly publications on sustainability in Google Scholar has been taken in one year period, i.e., 2024 with affiliations used by the authors/researchers/faculty at Imam Abdulrahman Bin Faisal University (IAU).

The sustainability events pertaining to **scholarly publications on sustainability** in 2024 are as below: -

IAU & its affiliations	Google Scholar Publications
Imam Abdulrahman Bin Faisal University	313
Total Publication with IAU and affiliations used by its researchers	313

IAU Transitions to “Blackboard Ultra” as a Step Towards Innovative Digital E-Learning

The Deanship of eLearning and Distance Learning successfully migrated and archived 100% of courses to the new system, fully trained and certified the technical team, and launched an extensive training plan that included 18 workshops for faculty members and 6 workshops for students, delivered in both Arabic and English. The Deanship also produced 38 diverse user guides — 34 for faculty and 4 for students — in addition to specialized guides supporting students with disabilities and practical guides on the use of AI tools integrated into the system.

12. Conclusion

As it is evident from Sustainability Report 2024-2025, IAU is active in executing necessary steps to make its campus more environmentally friendly, implementing a series of sustainability measures with the support of its stakeholders, especially volunteer students and faculty members. The sustainable effort of IAU is obvious from the sustainability modules introduced across different programs.

IAU has taken various sustainability initiatives:

- Creating Awareness among employees and community towards “Conserving energy is a shared responsibility.”
- Conducting health outreach programs and awareness programs among students, employees, and community regarding various health conditions to prevent various diseases and improve their quality of life.
- Planting seedlings by IAU students and faculty to promote environmental sustainability and support the Kingdom’s Vision 2030.
- Using solar panels to generate solar energy and use it for various purposes like signage boards, etc.,
- Implementing paperless online system to carryout IAU functions such as survey data collection, KPIs measurement, risk management etc.,
- Using E-Morasalat system at IAU to reduce paper use.
- Recycling 100 percent of its organic and inorganic waste.
- “Don’t throw away your computer” Initiative of IAU in cooperation with Irtiqa Association receives used computers and rehabilitate them to support students’ educational journey.
- Offering E-Scooters for staff and students. This initiative reduces greenhouse gas emissions by encouraging riders to use sustainable transportation methods.
- Planting trees in IAU campus with the involvement of students and staff to make Green University without Carbon under the slogan “Towards a Sustainable Environment”
- Utilizing electricity saving equipment to avoid wastage of energy.

. The aim of these initiatives is to reduce the university’s carbon emissions and create a Green University Campus. IAU is also considering a major sustainability-led campus renovation project which will help improve the students’ experience.
