

“ For Optimal Data Management ”

The Vice Presidency for
Scientific Research and Innovation
is launching

the Vice Presidency Data Unit

Towards a smarter and more sustainable future

Data Unit Who we are

Data Unit at Imam Abdulrahman Bin Faisal University Vice Presidency for Scientific Research and Innovation. It works as an umbrella platform that manages data and information related to the Vice Presidency's competencies, by collecting, verifying, classifying, processing, documenting and sharing them with the concerned authorities, while maintaining the principles of data privacy and confidentiality.

Objectives

- 1- Manage and governance the access to the Vice Presidency data and information
- 2- Documenting data and information while maintaining the privacy of personal data and the principle of data confidentiality.
- 3- Enhancing cooperation with the relevant authorities.
- 4- Raising awareness and educating the university employees about the importance of data and information.
- 5- Support the efficiency of the decision making process.

The Information Unit provides several information services, aimed to supporting the efficiency of the decision making process and enhancing the measurement of performance.
