

**Kingdom of Saudi Arabia**  
**The National Commission for Academic Accreditation**  
**&**  
**Assessment**

**Course Specification**

Institution: **University of Dammam**

College/Department: **College of Sciences / Department of Mathematics**

A. Course Identification and General Information

1. Course title and code: <b>Topology, Math 362N</b>
2. Credit hours: <b>3</b>
3. Program(s) in which the course is offered: <b>Mathematics program</b>
4. Name of faculty member responsible for the course: <b>A specific team from the mathematics department</b>
5. Level/year at which this course is offered: <b>6<sup>th</sup> level/3<sup>th</sup> year</b>
6. Pre-requisites for this course (if any): --
7. Co-requisites for this course (if any): <b>N/A</b>
8. Location if not on main campus: <b>College of Sciences – Girls Campus – Rayan City</b>

9. Mode of Instruction (mark all that apply)

a. traditional classroom	X	What percentage?	75%
b. blended (traditional and online)		What percentage?	
c. e-learning	X	What percentage?	25%
d. correspondence		What percentage?	
f. other		What percentage?	

Comments: **The e-learning concerns the use of blackboard, flip teaching, online assessment, ect.**

B Objectives

1. What is the main purpose for this course?

**On successful completion of this course students will be able to:**

**Know topological spaces, open sets, closed sets, accumulation points, closure and interior of a subset, neighborhood, characterize base and sub-base of topological space, sub-spaces, identify continuous map, know metric spaces, demonstrate connected spaces, know fundamental separation axioms, identify compact spaces,**

2. Briefly describe any plans for developing and improving the course that are being implemented. (e.g. increased use of IT or web based reference material, changes in content as a result of new research in the field)

- **Create, improve and complete (beamer or power point) presentations.**
- **Update the course by comparing to the contents at other universities.**
- **Follow up on the latest books to select the most appropriate to update the contents.**
- **Create a question bank.**
- **Find web sites related to the topic.**

C. Course Description (Note: General description in the form used in Bulletin or handbook) Course Description:

1. Topics to be Covered		
List of Topics	No. of Weeks	Contact hours
Topological spaces, closed sets, interior points, accumulation points, boundary points, and neighborhood.	3	6
Base and sub-base of topological space, sub-space of a topological space.	2	4
Continuous map	2	4
Connected spaces	2	4
Metric spaces	2	4
Separation axioms	2	4
Connected spaces	2	4
Compact spaces	2	4

2. Course components (total contact hours and credits per semester):						
	Lecture	Tutorial	Laboratory or Studio	Practical	Other : Office hours	Total
Contact Hours	<b>2*15=30</b>	<b>0</b>	<b>0</b>	<b>2*15=30</b>	<b>4*15=60</b>	<b>120</b>
Credit	<b>2*15</b>	<b>0</b>	<b>0</b>	<b>1*15</b>	<b>0</b>	<b>45</b>

3. Additional private study/learning hours expected for students per week.

**60**

4. Course Learning Outcomes in NQF Domains of Learning and Alignment with Assessment Methods and

T  
e  
a  
c  
h  
i  
n  
g  
S  
t  
r

t

e  
g  
y

On the table below are the five NQF Learning Domains, numbered in the left column.

**First**, insert the suitable and measurable course learning outcomes required in the appropriate learning domains (see suggestions below the table). **Second**, insert supporting teaching strategies that fit and align with the assessment methods and intended learning outcomes. **Third**, insert appropriate assessment methods that accurately measure and evaluate the learning outcome. Each course learning outcomes, assessment method, and teaching strategy ought to reasonably fit and flow together as an integrated learning and teaching process. (Courses are not required to include learning outcomes from each domain.)

Code #	NQF Learning Domains And Course Learning Outcomes	Course Teaching Strategies	Course Assessment Methods
<b>1.0</b>	<b>Knowledge</b>		
	Identify topological space, interior and adherent point. Identify continuous map and metric spaces.  Know fundamental separation axioms.  Know connected spaces. Recall compact spaces.	Interactive learning process through questions and answers in class.  Worked examples through a sequential delivery of surveying lectures.  Homework consisting in solving selected exercises.	Exams and homework are used to assess the acquired knowledge on the subject.
<b>2.0</b>	<b>Cognitive Skills</b>		
	To discuss the nature of space: topological space metric space.  To give a base or a sub-base of a topological space.  To give and apply definition of closure interior of sub- set.  To solve continuity of maps.  To use concepts of connected and compactness.	Lectures are covered by different worked examples.  Engage students in discussions with questions and answers.  Homework consisting in solving selected exercises.  Encourage and develop self education.	Homework include problems, solution of which requires scientific thinking, and applications of essential theorems and results of the course  Oral and written tests.  Explain and communicate the corrected answers of the exams and quizzes.  Research projects.
<b>3.0</b>	<b>Interpersonal Skills &amp; Responsibility</b>		

## 6. Schedule of Assessment Tasks for Students During the Semester

	Assessment task (e.g. essay, test, group project, examination, speech, oral presentation, etc.)	Week Due	Proportion of Total Assessment
1	Quizz1	4	5%
2	Mid-term1	6	15%
3	Quizz2	8	5%
4	Mid-term2	11	15%
5	Homework	Every week	5%
6	Research project	15	5%
7	Final exam	As scheduled	50%

### D. Student Academic Counseling and Support

1. Arrangements for availability of faculty and teaching staff for individual student consultations and academic advice. (include amount of time teaching staff are expected to be available each week)

**4 hrs/week for students' consultation and academic advice.**

### E Learning Resources

#### 1. List Required Textbooks

تيفاقثلا ي تبخلا تبتكم : رشانلا . نارز دمحم دمحا روتكدلا فيلاتر ماعلا  
ي جولوبوتلا في فةمدقم

#### 2. List Essential References Materials (Journals, Reports, etc.)

2. List Recommended Textbooks and Reference Material (Journals, Reports, etc)

ي ناعلا ر مائ الله اطعد ةمجرت-تفريد مائلو-ةملعلا

ايجولوبوتلا تايساساً-1

جولعلا ةيلك-تايضايرلا مسق.يودعلا ي سرمد.ط.دو ناظم رباقلا دبع دمحا.د.أ-

فيلآت.ماعلا ي جولوبوتلا--2

- 1426 ةيناثلا ةعبطلا -دشرلا ةبتكم -ميصقلا عرف -دوعسد  
كلملا ةعماج

4. List Electronic Materials, Web Sites, Facebook, Twitter, etc.

5. Other learning material such as computer-based programs/CD, professional standards or regulations and software.

#### F. Facilities Required

Indicate requirements for the course including size of classrooms and laboratories (i.e. number of seats in classrooms and laboratories, extent of computer access etc.)
1. Accommodation (Classrooms, laboratories, demonstration rooms/labs, etc.)  <b>Lecture room with 20 seats. Smart class.</b>
2. Computing resources (AV, data show, Smart Board, software, etc.)  <b>Computer room with at least 10 systems Computer room with 20 seats</b>
3. Other resources (specify, e.g. if specific laboratory equipment is required, list requirements or attach list)

#### G Course Evaluation and Improvement Processes

## 1 Strategies for Obtaining Student Feedback on Effectiveness of Teaching

<p><b>Student course evaluation at the conclusion of the course. Sample of assignments and tests. Observations and discussions during the semester.</b></p>
<p>2 Other Strategies for Evaluation of Teaching by the Instructor or by the Department</p> <p><b>Faculty assessment of the course and effectiveness of teaching delivery. Periodic self-assessment of the program.</b></p>
<p>3 Processes for Improvement of Teaching</p> <p><b>Participate to workshops on evaluation approaches and effective teaching methods to enable instructors to improve their teaching skill. Teaching method will focus on students' learning and on course learning outcomes.</b></p>
<p>4. Processes for Verifying Standards of Student Achievement (e.g. check marking by an independent member teaching staff of a sample of student work, periodic exchange and remarking of tests or a sample of assignments with staff at another institution)</p> <p><b>A Committee reviews samples of student work in this course to check on the standard of grades and achievements. An external faculty member evaluates the course material and the students' work to compare the standard of grades and achievements with those at his university.</b></p>
<p>5 Describe the planning arrangements for periodically reviewing course effectiveness and planning for improvement.</p> <p><b>Carry out Self- assessment at every two years and external assessment invited faculty members every four years. The feedback received from these assessments will be used to plan for further improvement in the course syllabus, teaching method, and delivery of course materials.</b></p>
